Introducing The Audit Corpus Platform

One Single, Integrated and Connected System for Audit Firms

Audit Corpus brings together quality governance, methodology, audit execution, documentation, AI and analytics in a single platform to help firms scale audits without compromising audit quality and engagement execution.

Audit Corpus Platform

Adopt and deploy at scale:

- Proprietary, regulator-aligned platform with audit firm-level customizations
- Role-based, risk-driven workflows that reduce audit deficiencies and enhance consistency

Audit Enablement Services

Partner with platform-trained teams that:

- Execute audits within system-enforced workflows
- Enable quality management and engagement execution at scale

Certification Programs (à la Azure)

Gain access to:

- Platform-native skill training to graduates through learning partnerships
- A ready pool of Audit Corpus-certified professionals for platform-governed execution

Quality governance system built on ISQM 1&2 and QC 1000.
centralised, scalable, and always current.

Make Quality a System, Not a Spreadsheet

- Centralized Digital Document Storage
- Independent Data Management
- Client Corporate Family Tree Structure Setup
- Engagement Acceptance & Conflict Check
- Partner, Manager, EQR & SPR Allocation and Rotation
- Staff Scheduling & Timesheets
- Staff Appraisal Data

Solution Benefits

- Regulator aligned framework
- Central repository of standardised policies and procedures
- Role-based permissions across teams
- Real-time quality oversight
- Customisable modules for firms of any size

Platform-trained talent to scale audit quality and execution

- Scalable talent pool on demand
- Complete onshore firm oversight
- Cost and time-zone arbitrage
- Quality built into the system by design

Audit Documentation & Archival Tool, an exhaustive, cloud-based content library built to ensure compliance with applicable Auditing Standards.

Plan · Execute · Document · Archive

- Risk & Controls Library
- IT Audit Content & Templates
- Set up Trial Balance and analyse
- Checklists for compliance

DA & AI Layer

- Journal Entry Testing (full population)
- AI Bank Reconciliation
- Trend Visualisations & Outlier Detection
- Document Authenticity Validation
- Execute Audit Procedures
- Quality Monitoring

 **Enablement Services** **Quality Lead Program**

On-demand quality leadership & policy development

 **Practice Support**

Inspection assistance & effectiveness assessment

 **Audit Quality Monitoring**

Root cause analysis & remediation planning

 **Training & Development**

Training for all team whether virtual, in-person, or hybrid

Tools to implement the quality governance policies

Library of Tools

- Independence - Personnel and Firm
- Client Corporate Tree
- Conflict Check
- Client and Engagement Acceptance / Continuance
- Partner, Manager and EQR - Workload and Allocation (including Rotation)
- Human Resource Management - Scheduling, Time Sheet, L&D and Appraisal

Solution Benefits

- Fully integrated with Engagement Performance Tools - ADAT and NASDAT
- Aligned with Professional Standards
- Consistent with QualiFrame Policies

- Seamless alignment with global frameworks such as GRI and BRSR
- Move from reporting to insight with a powerful analytics layer designed for decision-making.
- Understand where you stand and where to go next

Solution Benefits

- Simplifies complex ESG reporting through an intuitive, guided workflow
- Bridges the gap between sustainability reporting and core business functions

Streamline your workflow, ensure compliance, and boost audit quality with ease.

- ✓ 175+ years of Big Four Audit experience in one solution
- ✓ System-enforced quality controls
- ✓ Role-based, risk-driven workflows
- ✓ Flexible: modular or end-to-end
- ✓ Instant deployment, minimal setup
