

Job Description

Java Developer

Position Title: Senior Java Developer

Experience Required: 3+ years

Location: Kurla, Mumbai

Job Summary:

We are looking for an experienced Senior Java Developer to join our dynamic team. The ideal candidate will have a strong background in Java development, excellent problem-solving skills, and the ability to work collaboratively in a fast-paced environment.

Key Responsibilities:

- Design, develop, and maintain Java-based applications.
- Collaborate with cross-functional teams to define, design, and ship new features.
- Conduct code reviews and ensure adherence to best practices.
- Troubleshoot and debug existing applications to optimize performance.
- Mentor junior developers and assist in their technical growth.
- Stay updated with emerging technologies and apply them in development.

Required Skills and Qualifications:

- Proven experience of 3+ years in Java development.
- Proficiency in Core Java, Spring Framework, and Hibernate.
- Experience with RESTful APIs and microservices architecture.
- Strong understanding of databases (SQL/NoSQL) and data structures.
- Familiarity with version control systems like Git.
- Excellent analytical and problem-solving skills.
- Strong verbal and written communication skills.

Preferred Qualifications:

- Knowledge of front-end technologies like JavaScript, HTML, and CSS.
- Experience in cloud platforms such as AWS or Azure.
- Familiarity with DevOps tools and CI/CD pipelines.

What We Offer:

- Competitive salary and benefits package.
- Opportunity to work with a talented team and cutting-edge technologies.
- A supportive and inclusive work environment.
- Professional development opportunities.
