Job Description
Flutter Developer

Position Title: Flutter Developer

Experience Required: 2+ years

Location: Mumbai

Job Summary:

We are seeking an experienced Flutter Developer with a strong background in the banking or financial services domain. This role focuses on building secure and scalable mobile applications for Android and iOS using Flutter, in collaboration with cross-functional teams to deliver high-performance digital banking solutions.

Key Responsibilities:

- Develop and maintain mobile applications using Flutter and Dart.
- Ensure secure coding practices and compliance with standards like PCI-DSS.
- Integrate REST APIs and payment gateways.
- Implement robust state management using Bloc, Riverpod, or Provider.
- Work with tools like Firebase, push notifications, and CI/CD pipelines.
- Collaborate with designers, backend developers, and QA teams.
- Optimize performance, responsiveness, and user experience.

Required Skills and Qualifications:

- 2+ years of mobile app development experience.
- Minimum 1 year of hands-on experience in Flutter/Dart.
- Proficiency in state management tools (Bloc, Riverpod, Provider).
- Experience with secure API integration and data protection practices.
- Understanding of banking workflows, real-time systems, and data privacy.
- Bachelor's degree in Computer Science, Engineering, or related field.

What We Offer:

- Competitive compensation and benefits.
- Opportunities to work on cutting-edge technologies and projects.
- A collaborative and innovative work environment.
- Continuous learning and professional development support.
