

Job Description

Business Intelligence (BI) Developer

Position Title: Business Intelligence (BI) Developer

Experience Required: 3+ years

Location: US (Remote) – Must be a U.S. Citizen or Green Card Holder

Job Summary:

We are looking for an experienced Applications Architect to provide technical leadership, design, and strategy for healthcare applications. You will define and optimize architecture, ensure system integration, and align solutions with enterprise standards. This role requires collaboration with ITS teams, architects, and business stakeholders to deliver scalable, secure, and efficient systems.

Key Responsibilities:

- Gather, analyze, and document BI requirements in partnership with business users and developers.
- Design, develop, test, and maintain BI reports, extracts, and dashboards following best practices.
- Utilize Epic Cogito tools (SlicerDicer, SQL Metrics, Reporting Workbench, Radar Dashboards, BI Integration) for solution delivery.
- Work with Epic Clarity Data Model to create high-quality reporting for small to medium projects.
- Write optimized SQL queries, stored procedures, and perform query performance tuning.
- Manage the full report development lifecycle from requirements to deployment.
- Ensure BI solutions meet quality, performance, and security standards.

Required Skills and Qualifications:

- 3+ years of BI development experience, including requirements gathering and solution delivery.
- 2+ years of recent healthcare or IT experience.
- 1+ years of experience with BI tools and SQL on large datasets.
- Proven expertise with Epic Cogito and Clarity Data Model.
- Strong understanding of BI reporting best practices.
- Proficiency with Microsoft Office; familiarity with Visio and Project.

What We Offer:

- Fully remote U.S. opportunity with flexibility to work onsite as required.
- Competitive salary and benefits package.
- Opportunity to work on mission-critical healthcare applications.
- Collaborative team culture with professional growth opportunities.
