Industrial Grade AI

RANGER

The New Standard for Industrial Tendering

Industrial leaders are entering a new era of intelligent operations, yet teams still grind through legacy workflows, manually decoding dense RFQs, specs, and drawings across fragmented systems.

The result?

Slower decisions, higher risk, and unrealized competitive advantage in an industry racing toward AI-driven execution.

Ranger RFX transforms tendering into a unified, AI-powered workspace built for industrial complexity. With Ranger, every proposal, every spec, and every bid becomes part of a connected, intelligent process.

AI-Driven Precision

Ranger's agents are trained on your organization's data and standards, understanding technical language, specs, and compliance terms unique to your business.

Unified Workspace

One secure hub for every document, drawing, and team. No more switching tools or chasing updates.

Context Aware Answers

Upload RFPs, diagrams, or datasheets and simply ask. Ranger analyzes and extracts insights instantly, citing exact sources.

How it Works

01

Upload Once, Ranger Gets It

02

Ask And Analyze

03

Collaborate And Deliver

Ranger learns your structure, engineering standards, bids and compliance checklists.

AI agents identify key requirements, gaps, and risks across documents.

Collaborate on high-quality proposals, fully traceable and ready for submission.

Ranger redefines how energy companies respond to tenders with precision, speed, and confidence.

Core Capabilities

Ranger combines advanced AI agents with a secure industrial workspace, delivering the essential capabilities energy teams need to accelerate tendering, ensure compliance, and operate with confidence at scale.

**Knowledge Hub**

Leverage past wins and internal expertise to auto-surface relevant insights — empowering teams to build smarter, faster, and more accurate responses on every bid.

**Collaborative Workspace**

Coordinate every stakeholder in one governed workspace — align inputs, track progress, and deliver unified submissions without the usual handoff chaos.

**Technical Drawing Analysis**

Instantly extract specs, risks, and requirements from complex drawings and datasheets — so engineering teams can move from review to decision in minutes.

**Agent Ranger**

Deploy specialized AI agents to perform compliance reviews, draft content, and surface insights automatically. Letting experts focus on strategy, not search.

**Multi-Agent Library**

Build and refine proposals, pricing sheets, and documents collaboratively with AI — ensuring every version is accurate, aligned, and ready to send faster.

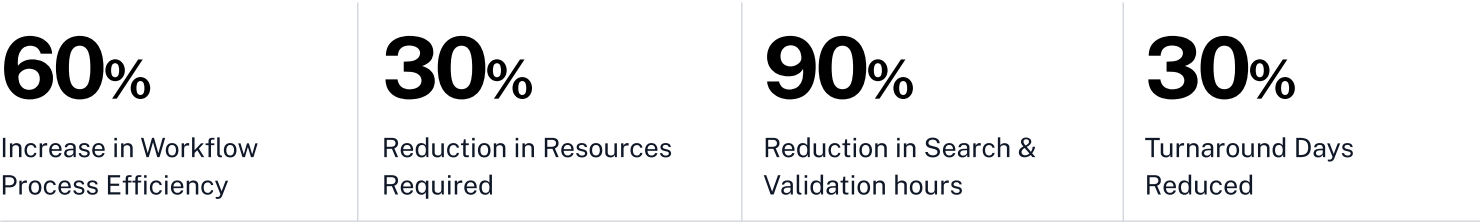

**Ranger Office**

Generate compliant, traceable deliverables linked to original sources. Giving teams audit-ready accuracy and the confidence to ship work without risk.

Industrial tendering’s response gap is now an AI problem.
Ranger is your compliance companion
— reading specs with enterprise accuracy.

Real World Impact

Ranger delivers measurable results.
Helping industrial teams cut decision time, reduce resource strain, and move projects forward faster.
