

HORSE & PONY COOLING CUBES

NON-HEATING CUBES IDEAL FOR HORSES AND PONIES IN LIGHT WORK OR AT REST

Low energy, oat-free cubes to maintain condition without excitability.

Research

Oatfeed is a rich source of beta-glucan which has been shown to have positive effects on the immune system, glycaemic response post-feeding, and on digestive health (Lindinger et al., 2017). Beta-glucan is a soluble fibre source that acts as a coating for the stomach lining and can help to regulate sugar release from the digestive system. It has also been shown to support immune response in performance horses (Paap & Roberti, 2014).

Feeding requirements

Feeding requirements will vary subject to individual needs, level of work, body condition and feed management practices. To discuss in further detail, please contact one of the Saracen Equine specialists.
