Research

BMC® (Buffered Mineral Complex) is a natural mineral source derived from a marine algae that is high in bioavailable minerals, including calcium, magnesium, boron, silicone, iodine, zinc and manganese. BMC® is used in all of the Saracen specialist breeding feeds following extensive research by Kentucky Equine Research (KER) into the positive effects on digestive health and bone development.

Feeding requirements

Feeding requirements will vary subject to individual needs, stage of pregnancy or growth, body condition and feed management practices. To discuss in further detail, please call our Thoroughbred Specialists on **+44 (0)1488 73456**
