

RECOUP 11

A LOWER PROTEIN, LOWER ENERGY MIX DESIGNED FOR EARLY FITTENING WORK

Recoup 11 makes for a smooth transition between the lower and higher energy racing feeds, as the nutrient levels and ingredients are very compatible.

Research

BMC® (Buffered Mineral Complex) is a natural mineral source derived from a marine algae that is high in bioavailable minerals, including calcium, magnesium, boron, silicone, iodine, zinc and manganese. BMC® is used in all of the Saracen specialist racing feeds following extensive research by Kentucky Equine Research (KER) into the positive effects on digestive health and bone development changes in normal routines.

Feeding requirements

Feeding requirements will vary subject to individual needs, level of work, body condition and feed management practices. To discuss in further detail, please contact one of our Thoroughbred Specialists.

Feeding rate notes

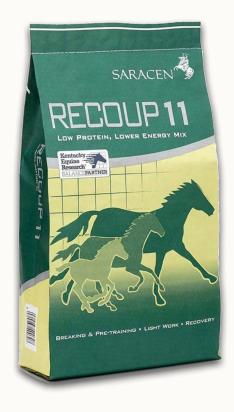

The feeding rates are offered as a guideline. If you would like to discuss your horse's individual requirements, please contact a member of our Thoroughbred Office on +44 (0)1488 73456
