

RACEFIT CUBES

A MODERATED STARCH RACING CUBE WITH HIGHER FIBRE LEVELS

Racefit Cubes have a more even balance of starch and fibre to maintain a consistent level of fitness without oversupplying 'fast-release energy'.

Research

BMC® (Buffered Mineral Complex) is a natural mineral source derived from a marine algae that is high in bioavailable minerals, including calcium, magnesium, boron, silicone, iodine, zinc and manganese. BMC® is used in all of the Saracen specialist racing feeds following extensive research by Kentucky Equine Research (KER) into the positive effects on digestive health and bone development.

Feeding requirements

Feeding requirements will vary subject to individual needs, level of work, body condition and feed management practices. To discuss in further detail, please contact one of our Thoroughbred Specialists.
