

KENTUCKY BALANCER

A HIGH SPEC CONCENTRATED OAT BALANCER MIX

A densely concentrated mix specifically designed to be fed to racehorses alongside oats.

Research

BMC® (Buffered Mineral Complex) is a natural mineral source derived from a marine algae that is high in bioavailable minerals, including calcium, magnesium, boron, silicone, iodine, zinc and manganese. BMC® is used in all of the Saracen specialist racing feeds following extensive research by Kentucky Equine Research (KER) into the positive effects on digestive health and bone development.

Feeding requirements

Feeding requirements will vary subject to individual needs, level of work, body condition and feed management practices. To discuss in further detail, please contact one of our Thoroughbred Specialists.

FEEDING RATE FOR MIX 1 SCOOP = 1.3kg	Feed	Frequency
	2.0 kg per head per day, then add enough oats to satisfy daily energy requirements	Per day

Feeding rate notes

The feeding rates are offered as a guideline. If you would like to discuss your horse's individual requirements, please contact our Thoroughbred Office on + 44 (0) 1488 73456
