

EQUI-JEWEL®

HIGH-FAT STABILISED RICE BRAN PROVIDING A HIGH LEVEL OF CALORIES AND TOPLINE SUPPORT

Delivers condition and muscle tone without adding fizz.

Research

Just 500g of EQUI-JEWEL® is equivalent to 1 cup of vegetable oil in terms of energy. EQUI-JEWEL® has a low glycaemic index (GI). The GI of a feed is the measure of blood glucose levels in response to feeding. A low-GI feed produces minimal spikes in blood glucose resulting in slow-release energy that decreases the risk of disorders such as developmental orthopedic disease, laminitis, digestive problems, and metabolic issues.

Feeding requirements

Feeding requirements will vary subject to individual needs, level of work, body condition and feed management practices. To discuss in further detail, please contact one of the Saracen Equine specialists.

FEEDING RATE

Feed (kg)	Frequency
0.5 - 1.0	Per day
