

DONKEY DIET

HIGH FIBRE FEED SPECIFICALLY DESIGNED FOR DONKEYS

Supports health, digestion and body condition in donkeys.

Research

The Saracen Donkey Diet formulation is based on oatfeed and wheatfeed, both of which are high fibre, low energy raw materials. Made from the fibrous outer husks of either the oat or wheat grain these ingredients have been chosen as they supply a very high level of fibre and low levels of starch, which is important to reduce the risk of metabolic issues, such as laminitis.

Feeding requirements

Feeding requirements will vary subject to individual needs, level of work, body condition and feed management practices. To discuss in further detail, please contact our Nutrition Team.
