

SUPER FIBRE CUBES

CEREAL-FREE FIBRE CUBE THAT SUPPORTS DIGESTIVE HEALTH AND SLOW RELEASE ENERGY

Low starch cube with digestible fibres for all round versatile use.

Research

A versatile and flexible feed for any horse requiring a fibre based and cereal free diet or require alternative fibre sources during times of forage shortage.

'Super-Fibres' are more digestible than other fibre sources, and provide a higher level of calories, which makes them very efficient at supporting weight gain and weight maintenance. For example, hay can be 40-60% digestible whereas the 'Super-Fibres' beet pulp and soya hulls are 80% and 75% digestible.

Feeding requirements

Feeding requirements will vary subject to individual needs, level of work, body condition and feed management practices. To discuss in further detail, please contact our Nutrition Team.
