

VETERAN BALANCER

LOW-CALORIE BALANCER FOR OLDER HORSES NEEDING DIGESTIVE AND METABOLIC SUPPORT

Ideal for older horses needing controlled weight and digestive support.

Research

Isomaltulose is a specialised by-product, derived from nature, produced through the manufacturing of sugar beet, to produce a unique low glycaemic syrup. This plant based coating features slowly digestible carbohydrates, which can help to provide an additional source of calories for horses and ponies that are in regular work or help to add a sweet taste to the diet of fussy feeders, helping to encourage consistent feed intake.

Research on the dietary impact of this low-glycaemic molasses has demonstrated its physiological benefits in both human and animal nutrition due to the provision of glucose (energy) that is slowly released into the bloodstream, helping to optimise digestive and metabolic function

Feeding requirements

Feeding requirements will vary subject to individual needs, level of work, body condition and feed management practices. To discuss in further detail, please contact our Nutrition Team.

FEEDING RATE	Bodyweight	Feed	Frequency
