LEVEL-GROW® WINTER CUBES

LOW GLYCAEMIC STUD CUBES DESIGNED TO SUPPORT BALANCED GROWTH IN YOUNG HORSES FROM OCTOBER TO APRIL

Formulated to support steady growth and help maintain normal skeletal development and strength.

BMC® (Buffered Mineral Complex) is a natural mineral source derived from a marine algae that is high in bioavailable minerals, including calcium, magnesium, boron, silicon, iodine, zinc and manganese. BMC® is used in all of the Saracen specialist breeding feeds following extensive research by Kentucky Equine Research (KER) into the positive effects on digestive health and bone development.
