

DESIGNED FOR OVERSIGHT. DELIVERED FOR OUTCOMES.

Koniag Cyber delivers security solutions trusted in the most regulated industries

Koniag Cyber specializes in comprehensive assessment, prevention, detection, and response solutions for highly regulated industries like defense, government, healthcare, banking, and energy. We create tailored cyber security solutions based on your risk profile, not someone else's template.

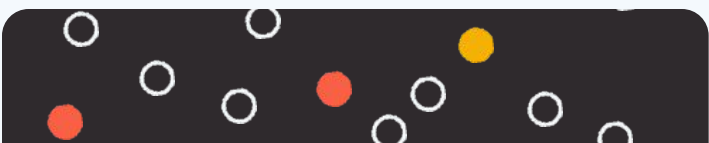

Assessment

Our cybersecurity assessments align with regulations and risk, identifying vulnerabilities and delivering actionable insights. We pinpoint compliance gaps and document everything, ensuring you prioritize effectively.

Prevention

We design security controls and policies to meet your regulatory and business needs, minimizing attack surfaces and hardening infrastructure to stop threats proactively, building resilient environments.

Detection

Our solutions offer continuous visibility, detecting anomalies and threats early via SIEM, AppSec, and tailored telemetry. We customize detection to your unique risk profile.

Response

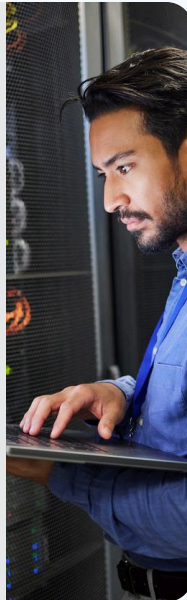

We deliver rapid, precise incident response to contain threats, restore operations, and preserve evidence. Our team guides you through investigation and recovery with expertise and calm.

CASE STUDY

Driving Transformational Cybersecurity Compliance for a Major Federal Agency

We implemented a full-scale cybersecurity program for a major U.S. government agency, modernizing their SOC and implementing a fully compliant SIEM.

Results: Reduced Mean Time to Contain (MTTC) by 212%. Slashed Mean Time to Detect (MTTD) by 57%. Increased their federal FISMA cybersecurity score from 1.5 to 4.

CASE STUDY

Department of Education: Securing 17M+ Students

We conducted a Zero Trust assessment for the Office of Federal Student Aid, analyzing loan servicing systems across five ZTA pillars. Our findings supported IRS 1075 compliance and strengthened their enterprise risk dashboard.

Results: Enhanced security for 17M+ student aid applications, meeting federal mandates.

"We have grown as a team, remained flexible, and adapted to changing circumstances when necessary. It has been a pleasure, and I am proud of all the work this team has accomplished."

Former Sr. IT PM and Contracting Officer's Representative
Office of Federal Student Aid, U.S. Department of Education
