# Maximizing the Value of Payments

To meet customers' changing needs and grow your business, you need a payment service that evolves and helps you reach customers wherever they may be. From point-of-sale to global eCommerce, we provide a complete payment solution that is everything your business needs to optimize payments and better serve your customers.

With a range of options that cater to your customers' changing needs and preferences, we make it easy for them to pay you in face-to-face and digital interactions.

From contactless taps to one-click online checkouts, our powerful tools help you manage your daily operations and keep your sales flowing smoothly.

It's no wonder why thousands of the world's most successful brands trust us to process their payment.

# Your Payment Provider of Choice

## Grow

We grow with your business and evolve with customer's changing needs. Whether moving online, growing into new markets, or opening more sites – we'll help you get there.

## Latest innovation

Offer customers the most popular and trusted payment methods, and enhance their experience with the latest payment innovations.

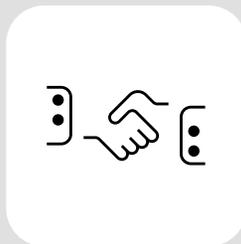

## Flexible

Empower your customers with flexible payment options through our omni-commerce platform. Accept, process, and settle payments, expand into new markets and add new payment methods to increase sales channels.

## Future-ready

As payment innovators, we're always developing and building new financial technology for the future so you're always ready for what's next.

## Trusted partner

Offering the highest security standards, we use the latest technology to help protect your business and customer data during each transaction.

## Reliable

Prioritize building great experiences instead of managing infrastructure. Our systems are designed for scalability and operate at 99.9% uptime, enabling you to take payments even in the busiest of times.

# The Payment Platform

Simplify your day-to-day management of payments and enable operational efficiency, effortless compliance and smoother customer experience with an all-in-one payment service.

Our leading technology adapts to any business, store, industry, or shopper journey. Our services make your payment stack faster, secure and better connected, whilst your customer's experience becomes smooth and effortless.

## All your channels consolidated

### In-person

- Accept payments with terminals and devices
- Seamlessly connect to your EPOS system

### Online

Accept payments on your website, in-app and through social channels with payment links

### Payment processing

- Authentication, risk management, tokenization, and gateway services

### Security & protection

P2PE, 3DS2 security & Tokenisation services to protect your business, simplify your PCI DSS compliance, and improve your customers' UX

### Reporting & management

Track sales, analyse data and manage devices across your estate from one central portal

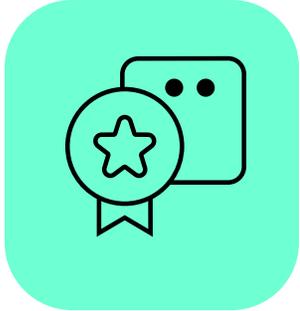

### Value add-ons

Next-gen advanced payment methods & more

### Acquiring

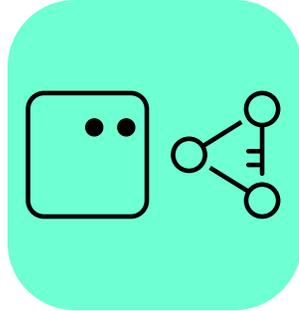

- Merchant account, deposit and settling funds
- Verifone Acquiring or option to bring your own acquirer

# The Best Choice for Merchants

## Upgrade

Whether moving online, growing into new markets, or opening more sites – we'll help you get there. Offer customers the most popular and trusted payment methods and enhance their experience with the latest payment innovations. From mobile wallet payments, like Apple pay, to convenient Buy Now, Pay Later options.

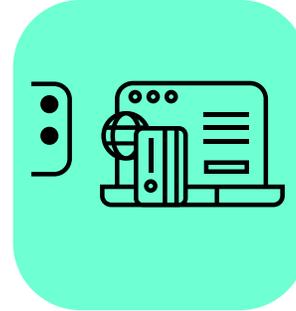

## Consolidate

Streamline your business by connecting all your payment processes with an omni-channel solution for seamless customer experiences. Make reconciliation and administrative tasks faster and more efficient by having a single provider and support team for all your payment needs.

## Protect

Every transaction powered by us happens in an encrypted, secure environment - from sale, to processing and storage. By using the latest PCI verified technology and tokenisation, we secure all business and customer payment data to simplify compliance and reduce security concerns.

## Manage

View and manage all your transactions in one place: analyze cross-channel sales and payment method patterns, to make more timely and more informed business decisions. Get a better understanding of your customer behavior and make data-driven decisions that can drive growth and success.

# Streamline Payments, Empower Staff, and Enhance Customer Experiences

Completely transform your daily operations, from orders and payments to staff and inventory management. Our Android range can help you conduct a range of useful business tasks in a sleek and centralized way, providing a number of benefits to your store from day one.

## **Enable streamlined operations with unified systems**

Android systems allow you to consolidate your store's usual business functions into one device. Consolidating your systems can reduce cost of ownership, helping you free up budget for other investments and innovations.

## **Let staff can work with confidence**

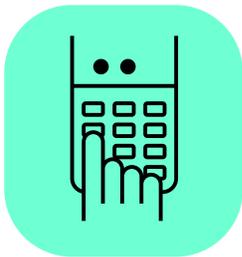

With handheld terminals loaded with all the needed software, your team no longer has to move back and forth between tools, systems, and payment terminals, making it easier to serve customers and take payments.

# Technology to enhance the customer experience

Be up and running accepting payments quickly with the latest pre-certified POS terminals and solutions. Every in-person payments solution meets PCI compliance, and is encrypted with P2PE.

Our solutions are fully compatible with leading retail EPOS systems, so you can easily integrate it into your existing system and streamline the payment process.

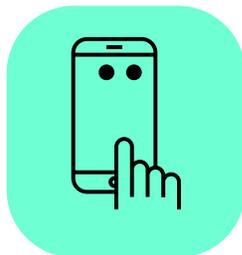

## Choose from a wide range of solutions

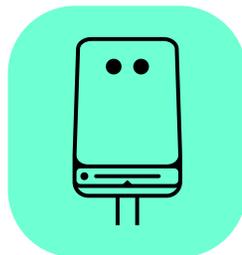

**Countertop & PIN pad**  
Compact and reliable devices tailor-made for your checkout

**Portable**  
Offer flexibility and fast-printing, indoors or outdoors, remote from the checkout

**Mobile**  
Designed to create seamless shopping experiences even when far away from the checkout

**Unattended**  
Robust, secure self-service payment devices to best suit your business

# A Frictionless Online Checkout

Whether you already have a website or want to start taking payments online, our gateway technology can provide smooth and straight-forward checkouts for your customers, helping to reduce cart abandonment and increase conversion rates. With just a couple of clicks we're ready to enable you to process different payment methods, checking transactions and distributing funds.

## Choose from a wide range of solutions

### Hosted Checkout

Leverage pre-built UI Options: re-direct, embed, or via Webshop plugins.

### API

Build your own UI & maintain full control over the look & feel of the checkout.

### JavaScript

A quick and secure way to encrypt and collect sensitive credit card data.

### Payment links

Generate dedicated links & accept payments with no-code.

# Our Solutions

TRINITY PORTABLE

# T650P

A portable with personality.

The T650p portable solution is a lightweight powerhouse that is beautifully styled to easily fit in hand and go where you go.

## Key specification

- Wi-Fi, Bluetooth®, 4G LTE, USB-OTG TYPE C, GPS
- 5.5" Color LCD HD resolution touchscreen
- Quad-core Cortex-A7 processor
- High-speed thermal receipt printer
- 2600mAH Li-Ion Rechargeable Battery
- Integrated Front & Rear Camera
- Verifone Secure Android OS
- PCI PTS 5.0 Approved Security
- 208mm L x 84mm W x 64mm H, 363g

# Reporting & Management

Access and manage all your activity through our cloud-based Merchant Portal, Verifone Central. Bring the most important operational data and user activities in one place. Whether you want to find out more details about your transactions, manage devices or generate reports, we provide an integrated service on Verifone Central. Seamlessly integrate new sales channels to your business and effortlessly monitor all your sales in one place. Say goodbye to the hassle of managing multiple platforms and hello to streamlined payment processing.

## Reporting & analytics

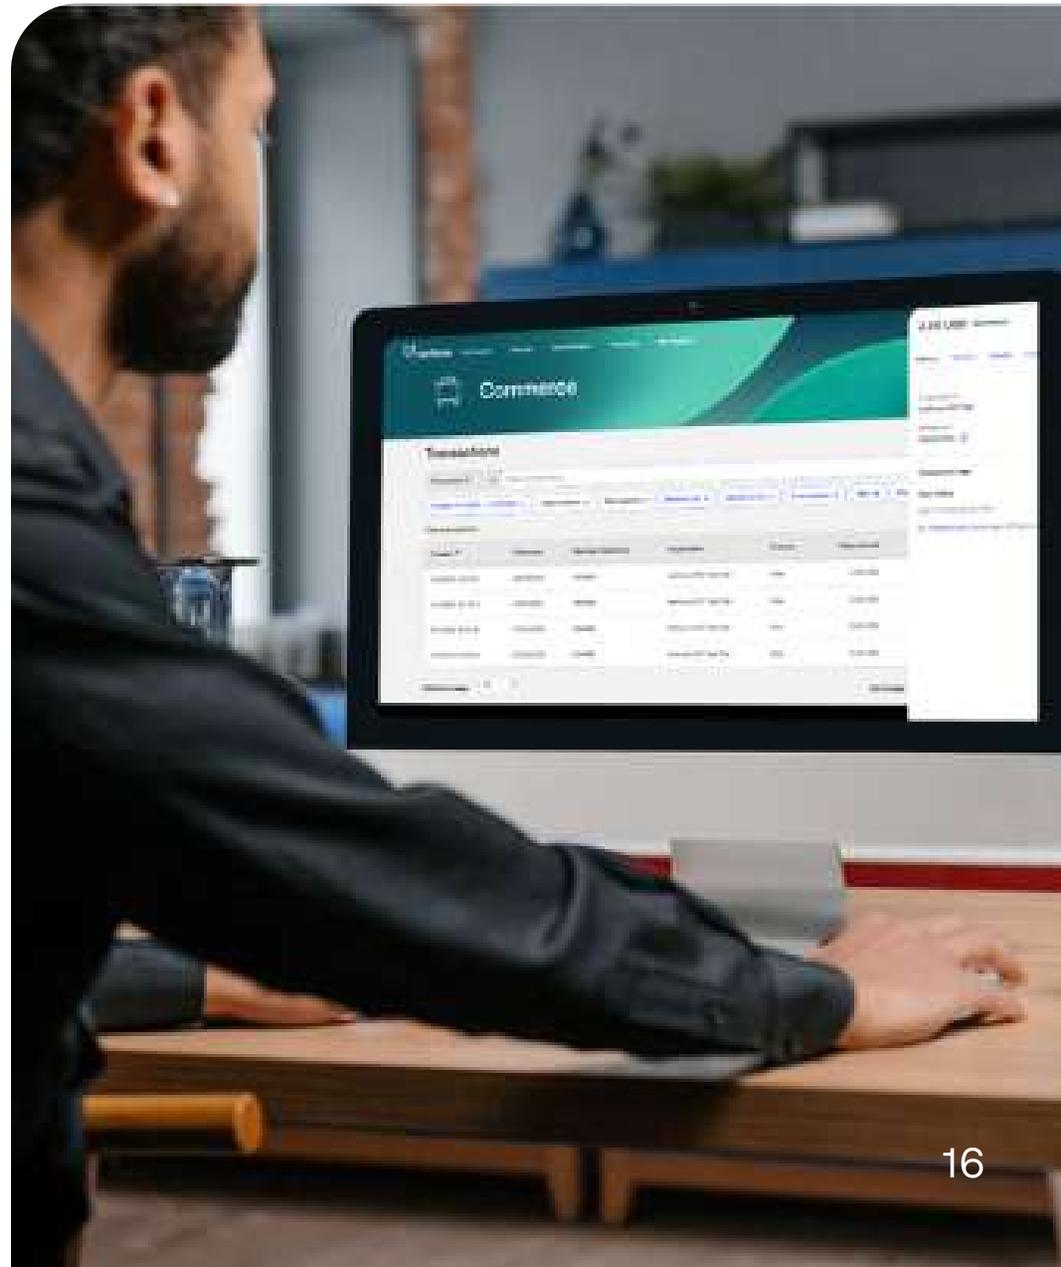

Explore your sales in one place and dive into the detail of a single transaction. Our reporting API also allows you to pull transactional data into your own business management systems seamlessly.

- Analytic dashboards
- Transactions & Settlement reports
- Report scheduler
- User roles and permissions

## Device management

Organise, manage and monitor your terminals all from one single platform.

- Device Reports
- Remote updates
- Device health diagnostics

# Top-Level Security

Every transaction powered by Verifone happens in an encrypted, secure environment - from sale, to processing and storage.

We are dedicated to providing the highest level of security for our clients. Our PCI compliance level is among the strictest in the industry, which simplifies your compliance requirements and reduces costs. Additionally, our devices are Point to Point Encrypted (P2PE), allowing your customers to use their preferred devices without sacrificing security. You can trust that your customers' data and your business are safe when working together with us.
