FACE SHIELD features

The NJORD face shield offers you great comfort and protection with its adjustable design covering the forehead and shield treated with anti-fog and anti-scratch technology.

With NJORD you can always expect:

- > Protective equipment for maximum safety
- > Premium quality and consistency in products
- > Global availability and standardization

EXPECT MORE

In Norse mythology, Njord was the patron of seafarers and the god of wind and waters. These characteristics have been transferred to our NJORD product line providing expert care to seafarers when they sail the seven seas.

FACE SHIELD features

The NJORD face shield is designed to provide effective protection against the risk of particle impact at high speed and medium energy and as protection against drops and liquid splashes.

The semi-circular brow guard is made from black polypropylene and includes a narrow brim. The visor is attached to the brow guard by means of 3 centre pins. The brow guard also contains a slot on each side to hold a bolt-nut system used to attach the brow guard and headgear.

The headgear system comes with a harness and adjustment system, manufactured of injection-moulded black polyamide. The harness is made of 2 parts, an upper cross strap and a contour strap. The length of the cross strap can be adjusted by means of the holes and anchor stud system.

The contour strap has a middle section (which rests on the user's forehead) and side arms that join at the rear of the head by means of the adjustment system. This system has a closing tube, guide and wing nut, allowing easy adjustment of the contour band circumference by simply pressing and simultaneously turning the wing nut. For greater comfort, it has a frontal anti-sweat textile band and a foam on the back at the contact point with the user's head.

Specifications:

- » CE Certification
- » EN 166:2001
- » Regulation (EU) 2016/425
- » Forehead protection
- » Anti-fog technology
- » Anti-scratch treatment
- » Flip-up function
- » 100% UV protection
- » Visor: 1.5 mm polycarbonate
- » Measures: 400 x 200 x 1.5 mm
- » Harness size: 56-64 cm
- » Mechanical strength (B)
- » Weight: 0.277 kg
