HI-VIS TROUSERS features

The NJORD hi-vis working trousers offer you maximum protection and comfort with its highly distinctive fluorescent colour, reflective and weather-resistant materials.

With NJORD you can always expect:

- Protective equipment for maximum safety
- Premium quality and consistency in products
- Global availability and standardization

EXPECT MORE

In Norse mythology, Njord was the patron of seafarers and the god of wind and waters. These characteristics have been transferred to our NJORD product line providing expert care to seafarers when they sail the seven seas.

HI-VIS TROUSERS features

The NJORD working trousers are made with a hi-vis yellow fluorescent surface in a retro-reflective material and provide high visibility to signal your presence in daylight, at night or in poor weather conditions while at sea or port.

The NJORD working trousers are fitted with reflective strips across both legs. The working trousers comply with EN ISO 20471:2013 class 2 of high visibility safety clothing. When used in combination with the NJORD hi-vis jacket, the user will comply with EN ISO 20471:2013 class 3 as the total surface of hi-vis material on the user exceeds the minimum requirements for class 3.

The NJORD working trousers are made of a water and wind-resistant material and come with 4 pockets. The trousers come in 5 sizes and have elastic waist band for a more comfortable fit.
