## HI-VIS VEST features

The NJORD hi-vis vest is a next generation reflective vest that offers you a highly distinctive and a practical safety vest due to its fluorescent colour as well as several options for storage and easy closing.

With NJORD you can always expect:

- Protective equipment for maximum safety
- Premium quality and consistency in products
- Global availability and standardization

### EXPECT MORE

In Norse mythology, Njord was the patron of seafarers and the god of wind and waters. These characteristics have been transferred to our NJORD product line providing expert care to seafarers when they sail the seven seas.

## HI-VIS VEST features

The NJORD hi-vis vest comes with 5 practical pockets including a transparent ID pocket and zipper closing. The 2 main pockets have a Velcro closing to keep items in pockets in different working positions.

The NJORD vest is made with a hi-vis yellow fluorescent surface in a retro-reflective material and offers high visibility to signal your presence in daylight, at night or in poor weather conditions while at sea or port. The NJORD vest is fitted with reflective strips across both torso and shoulders.

The NJORD vest complies with EN ISO 20471:2013 class 2, which is the highest safety class for high visibility clothing without arns.
