

WHEN SAFETY IS KEY

> Flip page for specs

LIFELINE features

The NJORD lifeline offers you maximum safety and mobility when working in the heights due to its energy absorbing and automatic locking technology.

With NJORD you can always expect:

- > Protective equipment for maximum safety
- > Premium quality and consistency in products
- > Global availability and standardization

EXPECT MORE

In Norse mythology, Njord was the patron of seafarers and the god of wind and waters. These characteristics have been transferred to our NJORD product line providing expert care to seafarers when they sail the seven seas.

LIFELINE features

The NJORD self-locking retractable lifeline comes with an automatic inertia braking system in case of a fall from heights.

When the device is secured to a safe anchoring point, it will enable the user to work with the maximum mobility, safety and comfort on slopes, roofs, from ships side and confined spaces.

Item no.:	IMPA code:	Product name
1466413	331107	LIFELINE SELF-LOCKING RETRACTABLE MWL 120 KG EN-360 15 MTR

Specifications:

- » Regulation (UE) 2016/425
- » EN 360:2002
- » RFU CNB/P/11.060
- » 15 MTR
- » Hook: Symmetrical connector with a manual threaded locking. 16 mm opening
- » ABS case
- » Energy absorber
- » Hook: Steel swivel connector. Automatic locking system. 19 mm opening
- » Assistance rope
- » Workload: - 120 kg.
- » Cable: 15 m – 4.8 mm diameter galvanized stainless steel
- » Recovery rope: Red-yellow cordino rope
- » Weight: 8 kg
