SAFETY BELT features

The NJORD safety belt allows the user to anchor himself safely and securely to the structure as the restraining belt is designed to adapt to the unique body type and physical characteristics of each user and to allow full freedom of movement or position during normal work activities with total comfort.

The safety belt's padded sash is foam-filled to prevent user discomfort and designed for a snug fit at the lower back. The padded sash is sewn to the waist belt.

The waist belt is made of a highly resistant red polyester strap with a width of 45 mm. The waist belt contains the D-rings used to secure the user to the anchorage point. A snug is obtained by adjusting the belt length with the buckles.

The lifetime estimated of this product is 10 years and 5 years after the first use.
