WELDING GLOVES features

The NJORD welding gloves offer you maximum protection and high dexterity due to their long-cuff design and heat-protectant materials.

With NJORD you can always expect:

- Protective equipment for maximum safety
- Premium quality and consistency in products
- Global availability and standardization

EXPECT MORE

In Norse mythology, Njord was the patron of seafarers and the god of wind and waters. These characteristics have been transferred to our NJORD product line providing expert care to seafarers when they sail the seven seas.

WELDING GLOVES features

The NJORD TIG / MIG welding gloves are a long-cuffed glove with heat-resistant abilities made of fine split leather.

It is a pair of general welding working gloves for the user that needs a high dexterity during welding work while being mechanical and heat-protectant according to EN 12477.

Item no.:	IMPA code:	Product name
1466391	851163	GLOVES WELDING LONG CUFFS HEAT RESISTANT

Specifications:

- » CE certification
- » EN 388:2016+A1:2018. (3.3.5.3.X)
- » EN 407:2020 (4.1.4.X.X.X)
- » EN 12477:2001+A1:2005
- » High dexterity
- » Long cuffs
- » Breathable
- » Heat-resistant
- » Abrasion resistance level 3
- » Cut resistance level 3
- » Tearing strength level 5
- » Puncture resistance level 3
- » Burning behaviour - max after flame time (2s) level 4
- » Burning behaviour - max after glow time (5s) level 4
- » Contact heat - temp (°C) for 15s threshold level 1
- » Convective heat – min. HTI (18s) level 4
- » Material: Split goat leather
