

THE TOWN OF EVA

Resolution Concerning Junior College

at Hanceville, Alabama

WHEREAS the enrollment at Wallace State Community College has outgrown the physical facilities since during the last five years the enrollment has grown from 200 to over 2,000 with half of these students enrolled in the Junior College Division, and

WHEREAS no money has been appropriated for classroom facilities since the Junior College was begun. The students deserve better service than can be provided under these conditions, and

WHEREAS the area served by this institution is becoming industrialized and has a rapid increase in population which indicates the enrollment will continue to double annually for the next three or four years, and

WHEREAS with a surplus of 74.4 million dollars in the Special Education Trust Fund, the next session of the Legislature would be an appropriate time for the Alabama Legislature to designate an adequate amount to be used for new buildings to house these students who are Alabama citizens and taxpayers.
