

## HOW IT WORKS

- **We provide the trucks, technology, and backend platform — you bring your brand.**
- **We fully white-label the mobile app and trucks with your brand**
- **Flexible Deployment: We offer multiple configurations to fit your operational needs. Choose from fully enclosed Chevy 2500 mobile units, modular skids that can be mounted on your existing trucks or vans, or ground-based skids placed exactly where interim charging solutions are required.**
- **1EV financial leasing options let you get started without large infrastructure investments.**

## Charge any type of fleet vehicle

The vision of 1EV is to move beyond the traditional view of infrastructure as stationary support, creating a future where infrastructure is purely mobile—anywhere, anytime.

No need to wait for cumbersome infrastructure to be permitted and built—our mobile infrastructure solution is immediate and can start charging now at a fraction of the cost of installing stationary charging equipment.

With 1EV, you'll never have to rely on the grid again to reach your destination or complete your work—we bring the charge to you.

We offer turnkey white-label programs for fleets, cities, and enterprise customers. Brand our mobile supercharger trucks and our mobile app technology platform as your own—including custom graphics, branded mobile apps, and tailored operations features.

How can we support your mobile EV charging journey? For a faster response, please contact Mark Webster at [mark@1evmobile.com](mailto:mark@1evmobile.com) or 408.857.1966.
