**EnMa G Pro Series**  
Soundproof Granulator

# EnMa G Pro Series

## Soundproof Granulator

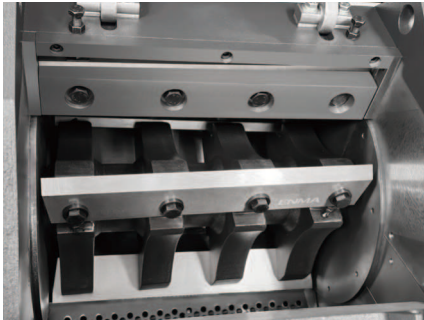

The EnMa G PRO series soundproof granulator is specially designed for in-plant recycling. The machine has three rotor widths: 500, 700, 1000 mm, and the rotor diameters are 400 mm and 500 mm.

EnMa G Pro series is a modular soundproof granulator that can be used for all types of plastics cutting. It is an ideal choice for in-plant recycling such as films, profiles, pipes, plates, injection molding parts, etc.

### Highlights

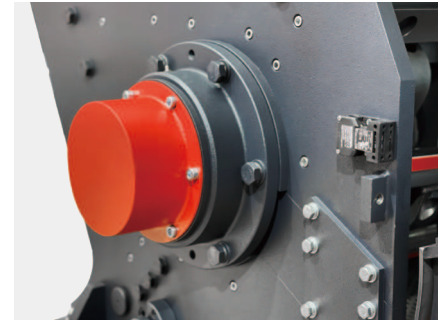

- Modular design
- Double-layer soundproof design
- Compact design
- Easy to maintain and replace blades

Machine body

The third set of blades

External bearing

## EnMa G Pro Series

### General technical features

Model	EnMa G300-300-Pro	EnMa G300-600-Pro	EnMa G400-1000-Pro
Overall dimension in mm	1400x1400x2000	1400x1700x2000	1850x1700x2500
Machine weight in kg approx.	2150	2350	4900
Feed opening in mm approx.	300x400	600x400	1000x700
Rotor diameter in mm	300	300	400
Standard motor in KW	7.5	15	22/30
Number of rotor blade	3x1	3x2	3x2
Number of stator blade	2	2	2x2
Standard screen in mm	8	8	10

Mission:  
Convert waste into sustainable energy  
or valuable materials
