BEAR SAFETY

WARNING BAR LIGHT & SOUND

The **Bear Safety Warning Bar** is a ceiling-mounted impact alert system designed to protect overhead structures and access points from vehicle collisions.

Installed in areas with restricted height or overhead hazards, it provides a clear physical and visual warning to forklift operators.

When contacted, the system triggers a combined light and sound alert, helping reduce accidental damage to doors, loading bays, and suspended infrastructure.

Available in multiple lengths, it offers a simple, effective solution for managing height clearance risks in busy operational environments.

Applications

- Low ceiling areas
- Loading bays and dock doors
- Mezzanine floors and gantries
- Overhead structures and walkways

Specification	Details
Available Lengths	2m and 3m
Colour	Yellow
Alert Type	Red light and audible alarm
Sound Output	102 dB
Battery Life	Up to 5 years (normal operation)
Impact Durability	Up to 70,000 impacts
Installation	Ceiling-mounted
Included Components	Snap hooks and chains (installation ready)

KEY BENEFITS

Safety

- Provides immediate visual and audible warning on impact
- Supports safer vehicle movement in restricted-height areas

Protection

- Helps reduce damage to doors, loading bays, and overhead systems
- Minimises risk to critical infrastructure

Cost Saving

- Reduces repair costs and operational disruption
- Helps avoid repeated collision-related damage
