BEAR SAFETY

DOOR ALERT SYSTEM

The **Bear Safety Door Alert System** is designed to help manage doors that are unintentionally left open, supporting safer and more controlled environments.

Commonly used in facilities such as accommodation, kitchens, and operational sites, the system activates an audible warning when a door remains open beyond a set time.

By prompting timely closure, it helps reduce risks such as smoke spread, temperature loss, or unnecessary alarm activations. Once the door is closed, the system automatically resets and is ready for the next cycle.

Specification	Details
Power Supply	240V AC
Supply Current	45mA (quiescent), 155mA max
Battery Backup	Not included
Sound Output	105 dB audible alarm
Alarm Relay Contacts	SPCO, 1A @ 30V DC
Auxiliary Power Output	200mA @ 12V DC
Enclosure Material	Durable ABS plastic housing
Tamper Protection	Integrated tamper switch with audible alert
Installation Type	Surface mounted
Door Contact	Surface contact with pre-wired cable (~1m)
Time Delay Settings	Adjustable (factory default ~1 minute)
Visual Indicator	LED status indicator
Reset Function	Automatic reset when door is closed
Dimensions (approx.)	175 mm (W) × 125 mm (H) × 50–60 mm (D)
