BEAR SAFETY

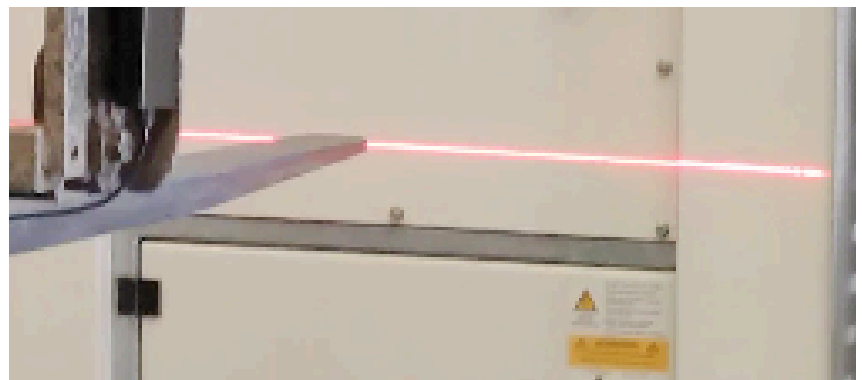

FORKLIFT LASER LINE

The **Bear Safety Forklift Laser Line** is designed to assist operators with accurate fork positioning during material handling tasks. By projecting a visible laser line, it provides a clear reference point for aligning forks with pallets, supporting more precise and efficient operation.

With simple installation and universal compatibility, it offers a practical solution for reducing handling errors and improving workflow in warehouse and logistics environments.

Specification	Details
Laser Colours	Red / Green
Mounting Method	Magnetic base (multi-point attachment)
Installation Time	Under 5 minutes
Power Source	Rechargeable battery
Battery Life	Up to 50 hours (typical use)
Operation Time	Up to 1 week per charge (depending on usage)
Activation Method	Automatic (fork movement detection)
Control Method	Wireless in-cabin remote
Compatibility	Suitable for all forklift types and carriage classes
Design	Compact, low-profile housing
Included Accessories	Battery pack, charger, remote control
