

Let's get ready for your annual portfolio evaluation!

I look forward to our conversational and consultative evaluation. This is a special time for you and your child to share your homeschool experiences. I'm here to create the annual documentation and support your family with encouragement and resources.

First, let's review your work samples from the school year to see your progress.

In **Language Arts**, we'll review your writing samples and read a short passage to check reading fluency and comprehension.

In **Math**, we'll discuss the new skills you've learned.

In **Science**, tell me about what you have learned about the physical and natural world.

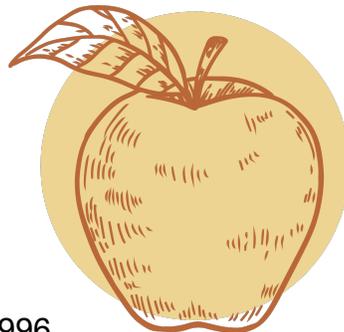

In **Social Science**, let's talk about what you have discovered about people and how they live in our world.

At the end, we'll plan your academic goals.

Afterwards, I'll send you our discussion notes and the documentation for your county.

It's a good idea to keep records and work samples in each subject for at least 2 years, in case your county requests to review your homeschool records.

- *School year calendar with school days marked
- *Weekly lesson plans (list of subjects and tasks)
- *Record of progress like a gradebook
- *Work samples in each core subject (at least 3)
- *Optional: log your trips, activities, and projects

Gratefully,
Christine Graves
