Include All Your Favorite People

Life is better shared

Gone are the days where family is defined by tradition, a household, or even a last name. That’s why we created Shared Membership—to leave behind the notion that any one idea of “family” can define your unique community. Whether it’s with loved ones, friends, neighbors or coworkers, you can tailor your membership to include up to ten people, so you can spend less time finding a shared meeting place and more time enjoying the company.
