

FRIGOMILK[®]

From tank to connected system

HOW IT WORKS

Scan the QR code

Access FIC app

Monitor real-time data

Manage service requests

View history and documents

fic SENSE

Real-time access, anytime, anywhere

What is **FIC**sense?

FICsense: make your FRIGOMILK smarter

FICsense is the integrated solution developed by FIC that combines a control unit with connectivity, designed to monitor and manage your **FRIGOMILK**.

Installed directly on the tank, FICsense acts as the system's control hub, while the integrated QR code gives you instant access to the FIC App and all connected services.

It's not just a washing system and not just an app—it's a complete ecosystem that connects your equipment to real-time data, documentation and support.

With FICsense, your FRIGOMILK evolves from a standard refrigeration equipment into a fully connected and intelligent solution:

- Greater control over daily operations **with real-time data access**
- Improved efficiency in management **through centralized information**
- More peace of mind in your work **with instant support and full traceability**

With FICsense, everything you need is already at your fingertips.

How **it** works

Just one scan to get connected

FICsense is designed to be simple, fast and intuitive.

The app requires no complex installation or technical setup – access takes just seconds, directly from your smartphone.

With FICsense, your tank evolves from a simple cooling system into a connected platform, providing real-time data, documentation and support.

HOW IT WORKS:

- Scan the QR code on your FRIGOMILK ●
- Instantly access the FIC platform ●
- View all data and services linked to your equipment ●

Each tank is uniquely identified, ensuring you always access accurate, up-to-date and machine-specific information.

What you **can** do

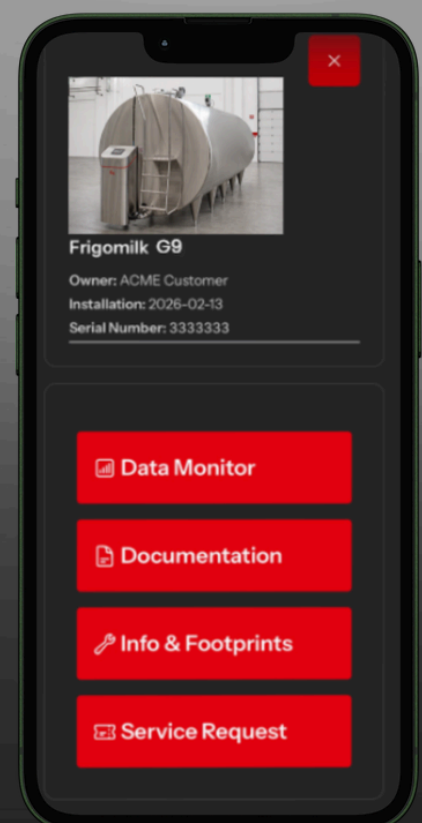

Everything under control, in real time

With FICsense, you can access a complete set of features designed to simplify the management of your FRIGOMILK and improve operational efficiency

- Monitor milk temperature and quantity in real time **for better operational control**
- Access manuals, certifications and official documentation anytime **to reduce downtime and speed up operations**
- Send and manage service requests quickly and easily **reducing service response time**
- View the full history of maintenance and service activities **for better organization and traceability**
- Stay up to date with FIC innovations and updates **and keep your system always optimized**

All your information is centralized in one easy-to-use platform, always accessible whenever you need it.

**Less time searching for information,
more control over your equipment.**

Want to **learn** more?

The future of your FRIGOMILK starts now

With FICsense, your FRIGOMILK is no longer just a tank—it's a connected, intelligent and constantly evolving system.
