

# ESPAS PLAYGROUND EQUIPMENT MANUAL

2026 | MADE IN GERMANY

espo

## Welcome to espas GmbH

creating unforgettable childhood memories since 2005

Since our founding in Germany, espas GmbH has been dedicated to design exceptional play equipment that inspires imagination, supports development, and brings pure joy to children. Now in our third generation, we proudly combine traditional craftsmanship with innovative, sustainable solutions.

All our products are Made in Germany, manufactured with precision and care, using eco-friendly materials and resource-efficient processes. Quality, safety, and durability are our highest priorities.

Our latest catalog presents a vibrant collection of playground equipment – from climbing frames and slides to swings and interactive play systems. Each product is designed to encourage physical activity, creativity, and social interaction.

espas GmbH is trusted by municipalities, schools, and early childhood centers across Europe and beyond. Our commitment to excellence makes us a preferred partner for high-quality, long-lasting playground solutions.

**THE LEADING EXPERT FOR  
PLAYGROUND EQUIPMENT &  
URBAN FURNITURE**

espas<sup>®</sup>  
NACHHALTIGE SPIELGERÄTE

## OUR EXPERTISE

### Cost-effective production methods

#### Smart purchasing

Raw materials are bought in bulk at low cost per meter and stored on the company's 25,000 m<sup>2</sup> premises.

#### Made in Germany

espas components are produced almost exclusively at our own factory in Kassel or by local suppliers. This minimizes environmental impact by eliminating unnecessary transport steps.

#### In-house production

Being independent from external suppliers allows us to be flexible in meeting your requirements and responding to market demands – ensuring consistent espas quality without fluctuations. Cost savings are passed on directly to you.

#### Pre-assembled

All play equipment is largely pre-assembled, requiring only final setup and installation on-site.

## YOUR ADVANTAGES

- » Quality directly from the manufacturer
- » Personalized consultation
- » Fast & simple delivery
- » TÜV-certified play equipment
- » Inquiry today – offer today
- » Customer service

# WELCOME TO THE WORLD OF ESPAS

## Made in Germany – affordable prices

Our clear preference is “Made in Germany,” as we are committed to creating local jobs.

Complete production is done in Kassel, with suppliers from northern Hessen.

Our regional focus ensures quality and cost-effective solutions.

## 20 years espas

In 2015, we celebrated our tenth anniversary.

Today, we have over 20 years of experience, dedication, and passion you can feel!

## We are member

We are members of the Federal Association of Playground Equipment and Recreational Facilities Manufacturers (Bundesverband für Spielplatzgeräte- und Freizeitanlagen-Hersteller e.V.) and the Association of Rotational Moulding (Central Europe) e.V.

## Tested, approved, labelled!

Our products naturally meet all DIN and EU standards. Numerous certifications are proof of their quality and safe play experience!

## espas GmbH Wins the „Grand Prize for Medium-Sized Enterprises 2010“

Key criteria: company growth, job creation, and security, as well as innovation and modernisation.

espas excelled – true to the motto: “Healthy SMEs – Strong Economy – More Jobs.”

## espas awarded the Business Magnet seal in 2019

Recognized across seven criteria:

- Economic performance
- Employer attractiveness
- Brand – Market – Marketing
- Organizational agility
- Innovation strength
- Social responsibility
- Growth focus

## ESPAS INSIGHTS

espas GmbH is a leading manufacturer of playground equipment and urban furniture. Our products stand out for their durability, safety, and child-friendly design. With expertise, creativity, and inspiration from children, we continuously looking for new ideas. We focus on long-lasting value and grow above the industry average year after year.

## ESPAS EXHIBITIONS

Through regular trade fair appearances, we offer customers and interested parties the opportunity to experience our products up close. We present current products and innovative new developments. Visit us and see our expertise for yourself at our exhibition stand.

# RECYCLING IS ENVIRONMENTAL PROTECTION

Environmental protection is not just our responsibility—it's close to our hearts. We want to help ensure the world remains green, healthy, and full of life for our children tomorrow. That's why we produce according to the most advanced eco-standards.

## 1. Durability

It all starts in private households, where packaging is placed in recycling bins...

## 6. Recycling

If our products are no longer used far into the future, they can also be returned to the recycling cycle. In this way, we contribute to environmental protection in a resource-saving and sustainable way.

## 5. Sustainable Production

In our manufacturing, polyethylene is used to create various components such as slides, roofs, or spring animals.

They can be 100% recycled.

Production waste from PE manufacturing is also sent for melting down and processed into recycled PE sheets and recycled PE granulate.

## 2. Ecological

... or collected in yellow bags.

## 3. Economical

The contents are transported to sorting facilities, where packaging is separated by raw material. Unsuitable residues are sorted out.

## 4. Easy Processing

The plastic packaging is compressed into bales and processed into pellets at specialized production sites.

The pellets are melted and injection-molded into shapes that form the basis of our required material, polyethylene.

# ESPAS PRODUCTION

## 1. Metalworking

In our metalworking, all steel parts are prepared for galvanization and further processing.

We use only high-quality, thick-walled raw materials, which we purchase in large quantities. This allows us to pass the low meter prices directly on to you – your price advantage!

## 2. Hot-Dip Galvanizing

The prepared steel parts are dipped in a bath of molten zinc in one piece.

The zinc coating fully encloses the component, creating a durable and robust layer of corrosion protection for the play equipment.

## 3. Powder Coating

The electrically conductive, galvanized steel is manually coated with powder paint in our facility.

Unlike automated systems, this method saves

powder—protecting both the environment and your budget.

After application, the part is cured in an oven to solidify the coating.

Since 2012, our large-format powder coating system allows us to coat all components efficiently.

#### 4. CNC Milling

Our CNC milling machine cuts the bases for tower combinations and spring animals from polyethylene sheets. To minimize waste, as many parts as possible are cut from each sheet. The leftover material is recycled and processed into new PE granulate.

#### 5. Rotomoulding

The steel or aluminum mold for slides or roofs is attached to the rotator using a crane, filled with PE granulate, and placed into a 270°C oven. The mold rotates biaxially, melting the granulate and evenly distributing it. After cooling, the part is removed, smoothed if needed, and further processed. Since 2014, we have owned a rotational molding system.

#### 6. Assembly

All components are carefully assembled by hand into finished play equipment. espas play equipment is mainly delivered pre-assembled and only needs to be set up or installed. This saves you time and money!

## ESPAS CNC

Thanks to our three new, state-of-the-art cutting machines, we can guarantee our customers precise and efficient construction of play equipment. These machines also enable efficient use of the materials we work with.

For steel play equipment, precise manufacturing takes place at our steel bar processing center. Innovations such as the dynamic servo drive, traveling tool magazines, and separate work zones for pendulum operation allow for fast processing times. All machining steps—milling, drilling, threading, thread milling, notching, and sawing—are performed with the profile bar stationary to protect the surface.

Our aluminum bar processing center enables precise, flexible, and millimeter-accurate cutting of aluminum play equipment. With up to eight milling units, a versatile clamping system, travel clamps, and a swivel gripper, it fully automates processing of various profiles. This saves time, reduces costs, and minimizes material waste, benefiting both customers and the environment.

Our Plasma CNC, featuring Instant Cut Technology, reduces idle movements, cuts processing time, and nearly doubles production capacity. It also allows exact cutting of materials for customized future play equipment.

## ESPAS WELDING ROBOT

Our latest investment in production is a state-of-the-art welding robot. It stands out not only for precision but also for impressive speed to optimize the manufacturing process.

Our welding robot handles a wide range of welding tasks, from thin sheets to robust structures, adapting flexibly to individual requirements.

Its intuitive interface allows easy control and programming, making even complex welds simple and efficient.

From intricate playground equipment to functional urban furniture, every weld contributes to a safe and visually appealing final product.

All our products meet the highest safety standards for public spaces. The welding robot ensures reliable construction of durable, safe, and attractive products designed to withstand heavy use.

## ESPAS ROTOMOULDING

Since mid-2014, we've been on of the few European playground manufacturer with our own rotational molding system, allowing us to produce polyethylene parts like slides, roofs, and spring toys in-house.

This saves transport and outsourcing costs, benefiting the environment. Our system lets us design unique parts, such as comfortable slide entries and practical toy and grit boxes.

We have full control over quality, flexibility, and delivery times, passing these advantages to our customers.

Since 2014, we have owned this rotational molding system.

 Association of Rotational Moulding  
(Central Europe) e.V.

## **ESPAS LARGE-SCALE POWDER COATING**

Electrically conductive, galvanized steel is manually coated with powder paint in our facility. Unlike automated systems, this method saves powder, protecting both the environment and your budget. After application, the part is baked in an oven to cure the coating.

# ESPAS MATERIALS – QUALITY FOR YOU

## Powder-Coated Aluminum

Aluminum is a corrosion-resistant material. Powder coating enhances its aesthetic appeal with color. The smooth surface is highly durable and long-lasting.

## Hot-Dip Galvanized Steel

Hot-dip galvanized steel provides highly effective corrosion protection. Maintenance requirements are relatively low. Prepared steel parts are dipped into a bath of molten zinc, which coats the entire component.

## Powder-Coated Steel

Powder coating in our in-house facility provides additional protection and gives the steel components a vibrant finish in various RAL colors.

## Recycled Posts

Recycled posts represent an eco-friendly and sustainable option. In close cooperation with our partners, packaging waste is converted into the production of our posts.

## Spruce

Core-separated, pressure-treated spruce wood. High-quality timber with a 5-year warranty.

## Polyethylene, PE

Polyethylene is a temperature- and UV-resistant plastic. It is colored throughout, so the colors do not fade. Even scratches on the surface that may occur over time remain barely visible.

## espas provides a warranty

Applies exclusively to original espas products purchased from

- Material defects
- Design defects
- Functional defects

Provided that:

- Proper installation
- Maintenance performed according to the espas maintenance manual

## No entitlement to warranty

- In cases of improper installation
- If maintenance according to the espas maintenance manual is not carried out
- In cases of vandalism
- For normal material wear
- For external changes such as discoloration of plastic parts

Impact surface:	1.020 x 800 cm
Foundations:	50 x 50 x 50 cm (10x) 180 x 50 x 50 cm (2x)

### Trained skill:

coordination

### Description:

The climbing, pull-up, and monkey bar course with horizontal bars allows for a variety of exercises to strengthen the entire muscular system.

## espas Calisthenics Fulda

H100F21

Powder-coated aluminum

### Technical specifications

Height:	ca. 250 cm
Width:	ca. 400 cm
Length:	ca. 430 cm
Impact surface:	700 x 730 cm
Foundations:	50 x 50 x 50 cm (8x) 100 x 50 x 50 cm (1x)

### Trained skill:

coordination

### Description:

The climbing, pull-up, and monkey bar course with horizontal bars allows for a variety of exercises to strengthen the entire muscular system.

## espas Pull-up station

H100F20

Hot-dip galvanized steel

### Technical specifications

Impact surface: Ø 670 cm  
Foundations: 50 x 50 x 50 cm (6x)

### Trained skill:

strength

### Description:

Grip a chest-height bar at shoulder width.

Jump up with straight arms into a support position, keeping your body straight.

## espas Stretching station

H100F17

Hot-dip galvanized steel

### Technical specifications

Height: ca. 200 cm  
Width: ca. 175 cm  
Length: ca. 196 cm  
Impact surface: 580 x 600 cm  
Foundations: 50 x 50 x 50 cm (4x)

### Trained skill:

mobility

### Description:

This equipment allows for various stretching exercises that improve the mobility of all major body structures.

## espas Push up

H100F11

Hot-dip galvanized steel

### Technical specifications

Height:	ca. 110 cm
Width:	ca. 87 cm
Length:	ca. 223cm
Impact surface:	540 x 400cm
Foundations:	50 x 50 x 50 cm (4x)

### Trained skill:

strength

### Description:

Support yourself on the bars with a straight body and perform push-ups. Adjusting the support height targets the arms, shoulders, and chest. Bending your knees makes the exercise easier.

## espas Body row

H100F12

Hot-dip galvanized steel

### Technical specifications

Height:	ca. 205 cm
Width:	ca. 87 cm
Length:	ca. 223 cm
Impact surface:	640 x 500cm
Foundations:	50 x 50 x 50 cm (4x)

### Trained skill:

strength

### Description:

Hang from the bars with both arms, keeping your body straight. Raise and lower your body by moving your arms. Changing the grip height trains the chest, back, and arm muscles.

## espas Balance rope

H100F13

Hot-dip galvanized steel

### Technical specifications

Height:	ca. 45 cm
Width:	ca. 80 cm
Length:	ca. 402 cm
Impact surface:	710 x 380 cm
Foundations:	80 x 80 x 50 cm (2x)

### Trained skill:

coordination

### Description:

Stand on the platform and balance forward, sideways, or backward across the rope to the platform on the other side. Another exercise is to balance on the rope on one leg.

## espas Balancing bar

H100F14

Hot-dip galvanized steel

### Technical specifications

Height:	ca. 60 cm
Width:	ca. 12 cm
Length:	ca. 300 cm
Impact surface:	600 x 320 cm
Foundations:	50 x 50 x 50 cm (2x)

### Trained skill:

strength

### Description:

Balance forward, sideways, or backward across the fixed beam. Another exercise is to stand on the beam on one leg.

## espas Wooble board

H100F16

Hot-dip galvanized steel

## GENERAL TERMS AND CONDITIONS

espas GmbH

Graf-Haeseler-Str. 9-11 | D-34134 Kassel, Germany

Phone: +49 (0)561-574 63 90 | Fax: +49 (0)561-574 63 99

Email: [info@espas.de](mailto:info@espas.de) | Website: [www.espas.de](http://www.espas.de)

### 1. BASIC PROVISIONS / PROVIDER IDENTIFICATION / SUBJECT MATTER OF THE CONTRACT

1.1 These General Terms and Conditions (GTC) apply particularly to deliveries and services to businesses, legal entities under public law, or special public funds. For consumers, these terms only apply where they do not conflict with statutory provisions.

1.2 These GTC apply to all contracts between espas GmbH (hereinafter referred to as „espas“) and the customer, unless otherwise agreed in writing. Customer's own terms do not form part of the contract unless explicitly agreed in writing.

1.3 Customers of espas may be consumers (§ 13 BGB) or entrepreneurs (§ 14 BGB).

1.3.1 A consumer is any natural person who enters into a legal transaction for purposes that are not primarily related to their trade, business, or self-employed professional activity.

1.3.2 An entrepreneur is any natural or legal person or a legal partnership who acts in the course of their commercial or independent professional activity when concluding the legal transaction.

1.4 The subject matter of the contract is the sale of goods.

### 2. CONCLUSION OF THE CONTRACT / CONTRACT LANGUAGE

2.1 All offers from espas are non-binding.

2.2 The contract becomes valid once espas confirms the customer's order in writing (e.g. by email) or delivers the goods.

2.3 Changes to the construction, design, or materials of goods are reserved.

2.4 espas retains ownership and exclusive copyrights to cost estimates, drawings, and documents.

2.5 espas assumes no procurement risk for the products and reserves the right to withdraw from the contract in case of incorrect or improper self-supply. In such cases, espas will inform the customer immediately and refund any payments already made. Liability for intent or negligence remains unaffected under clause 10.

2.6 The language of the contract is German.

### 3. PRICES; PAYMENT TERMS

3.1 Prices are net prices, excluding any applicable VAT. Cross-border deliveries may incur additional taxes or duties (e.g. customs), payable by the customer.

3.2 Unless agreed otherwise, prices do not include shipping, freight, or insurance costs, which will be communicated prior to dispatch.

3.3 Unless otherwise agreed, payment is due upon delivery. espas reserves the right to demand advance payment.

3.4 For agreed advance payments, the customer must pay the total amount within 10 days of receiving the request for payment. Failure to pay results in default. For cash on delivery, payment is due upon delivery to the transport company.

3.5 Default occurs with a reminder after due date or 30 days after receipt of invoice at the latest. In case of default, interest of 9 percentage points (5 for consumers) above the base rate plus statutory default damages apply.

3.6 The customer may only exercise a right of retention if the counterclaim is based on the same contractual relationship or is legally established or acknowledged by espas.

### 4. DELIVERY AND SHIPPING CONDITIONS; TRANSFER OF RISK

4.1 Delivery will be made to the address provided by the customer. Self-collection requires prior written agreement with espas.

4.2 Delivery includes only the ordered goods, not installation.

4.3 Delivery times are non-binding. After a 14-day delay, the customer may set a final deadline. espas is in default only after that deadline. Damages for delay are only owed if espas acted intentionally or with gross negligence. Liability is limited to the agreed remuneration. The customer's right of withdrawal remains unaffected.

4.4.1 For business customers, the risk transfers upon handover to the customer or authorized person, or to the transport carrier in case of shipping.

4.4.2 For consumers, the risk transfers only upon actual handover, including in case of shipping.

4.4.3 If the customer delays acceptance, the risk transfers at that point.

4.5 espas may make partial deliveries and invoice them separately.

4.6 The customer must accept delivery of the goods.

4.7 espas may claim 25% of the contract value as compensation in case of non-fulfillment. Both parties may provide proof of a higher or lower actual damage.

### 5. RIGHT OF WITHDRAWAL

No right of withdrawal exists for business customers, public entities, or public special funds.

Consumers have the following right of withdrawal:

You may cancel the contract within 14 days without giving reasons, starting from the day you or a third party (not the carrier) takes possession of the goods.

To exercise your right, notify us at:

espas GmbH  
Graf-Haeseler-Str. 7-11  
34134 Kassel, Germany  
Phone: +49 561-574 63 90  
Fax: +49 561-574 63 99  
Email: [info@espas.de](mailto:info@espas.de)

You may use the attached withdrawal form, but it is not mandatory.

Effects of Withdrawal:

If you cancel, we will refund all payments including standard shipping costs within 14 days from the day we receive your notice. Refunds will use the original payment method unless otherwise agreed. We may withhold the refund until goods are returned or proof of return is provided.

Return goods within 14 days of cancellation. You bear the return costs. Items not suitable for parcel shipping will be picked up at the original delivery charge. Any loss in value due to unnecessary handling must be compensated.

#### Sample Withdrawal Form:

I/We () hereby cancel the contract for the purchase of the following goods / services:

Ordered on: \_\_\_\_\_ | Received on: \_\_\_\_\_

Name & address of the consumer: \_\_\_\_\_

Date: \_\_\_\_\_ | Signature: \_\_\_\_\_

() Delete as appropriate

#### 6. RETENTION OF TITLE / RIGHT OF RETENTION

6.1 Goods remain the property of espas until fully paid.

6.2 A right of retention exists only for claims from the same contract or recognized in writing.

6.3 For entrepreneurs:

6.3.1 Ownership remains with espas until full settlement of all claims from the business relationship. No pledging or assignment before ownership transfer.

6.3.2 In case of resale, the customer assigns claims from such sale to espas up to the invoice value. espas may collect if the customer defaults.

6.3.3 In the case of combination or mixing with other goods, espas gains co-ownership proportional to its invoice value.

6.3.4 espas will release securities if their realizable value exceeds claims by more than 10%.

#### 7. REPORTING TRANSPORT DAMAGES

The customer agrees to support espas in asserting claims for transport damages. This does not affect statutory warranty rights.

For entrepreneurs:

7.1 Examine the goods upon delivery. Visible damages must be noted on shipping documents and confirmed by the delivery person.

7.2 Hidden damages must be reported within 5 days to espas or within 7 days to the shipping company.

#### 8. WARRANTY RIGHTS

8.1 Damage caused by improper use is not covered.

8.2 Customers have a statutory right to repair or replacement.

8.2.1 Consumers can choose between repair or replacement unless this causes unreasonable cost.

8.2.2 For entrepreneurs, espas chooses between repair or replacement.

8.3 Warranty periods:

New goods: 2 years for consumers, 1 year for businesses

Used goods: 1 year for consumers, no warranty for businesses

8.4 Exceptions: Espas's liability under clause 10 or for third-party property rights.

8.5 §§ 478, 479 BGB (business recourse) remain unaffected.

8.6 Entrepreneurs must report visible defects within two weeks of delivery, in writing. Timely dispatch is sufficient.

#### 9. LIABILITY

9.1 espas is fully liable for injury to life, body, or health caused by negligence or intent, and for damages under product liability law or warranty.

9.2 For other damages from minor negligence, espas is only liable for breach of essential duties (cardinal obligations) and only up to foreseeable damages.

9.3 For minor breaches of non-essential duties, espas is liable to consumers only for foreseeable damages.

9.4 No further liability exists.

#### 10. DATA PROTECTION

The privacy policy is available at: [www.espas.de/datenschutz](http://www.espas.de/datenschutz)

#### 11. FINAL PROVISIONS

11.1 German law applies.

11.2 For consumers, the law of their habitual residence may also apply if it offers more protection.

11.3 The UN Convention on Contracts for the International Sale of Goods (CISG) does not apply.

11.4 Place of performance and exclusive court of jurisdiction is espas's registered office if the customer is a business or public entity. If the entrepreneur has no general jurisdiction in Germany or residence is unknown, the same jurisdiction applies. Espas may also sue at another legal venue.
