HOW WE HANDLE YOUR DATA

When you share documents with us for your Index, you are trusting us with some of the most sensitive information about your company. This is how we look after it.

Who sees your documents

Only the small team preparing your Index: the analyst assigned to you and the senior reviewer. DoneDeal does not see your documents or your scores unless you ask us to share them.

Where they are stored

Your documents are stored in Microsoft's data centres in the United Kingdom. Your scores are stored separately from your name and your company's name.

What we use them for

One thing only: preparing your Index. We do not share your documents or results with buyers, investors, advisers or anyone else. We do not sell them.

How long we keep them

We keep your documents for 24 months so we can measure your progress if you ask us to score you again. After that we delete them, or sooner if you ask.
