

Good Faith Estimate

You have been referred to my office for treatment. I'm required by the 2022 No Surprises Act to give you a Good Faith Estimate of the cost of treatment if you are uninsured or don't want to use insurance for this care. Since we haven't met, and don't yet know if you want to use insurance for your treatment, the information below is based on "fee for service" (out of pocket) rates.

If you DO intend to use insurance, check with your insurance carrier to find out what your copayment or coinsurance rates will be—they are likely to be much smaller.

Since I have not yet evaluated your difficulties or symptoms, I must at this point estimate your course of treatment based upon the national average for a course of psychotherapy, which is 18 encounters.

This initial estimate is valid for 12 months, but you are entitled to receive an update on this estimate at any time upon request.

Current ICD-10 diagnosis: R69 (diagnosis deferred).

Anticipated treatment:

1 session of CPT 90791 (diagnostic evaluation) at a *Maximum* rate of \$250.

16 weekly sessions of CPT 90837 (psychotherapy, 60 minutes) at a *Maximum* rate of \$175 per session

Total of estimated "fee for services" treatment without insurance: \$3,025

This is just a rough estimate based on national averages. The duration of our work together can be longer or shorter depending upon your symptoms, your work between sessions, and your response to treatment.

Unless required by a court order (an extremely rare situation), you are free to discontinue treatment at any time, and free to discuss any other modifications to treatment modalities, frequency, or duration.

You are ultimately in control of your own healthcare; I am just here to provide help at your request.

Location of treatment: All sessions will take place online

My identifying information:

FamLee First Clinical Services, LLC

National Provider Identifier: 1285421727

Tax ID number: 88-3324757
