

BioFert TE™ is a superior mineral balance for plant nutrition and is certified organic.

Biofert Plus TE contains high levels of Phosphate, Potassium, Calcium, Magnesium and Sulphur, as a natural replacement for superphosphate designed for home gardeners' use. Biofert Plus TE will not burn plant roots and can be applied close around the root zone of all plants.

BIOFERT TE

- Feeds plants in balance through biological delivery of minerals.
- Reduces nutrient loss into the waterways and retains minerals in the soil until needed by the plants.
- Promotes healthy plant life to resist insect and fungi attacks.
- Grows fruit and vegetables that are healthy to eat and taste good.
- Ensures plants that flower have vivid colours.
- Builds healthy soil that fixes carbon and nitrogen.
- Suitable for all areas of the garden and indoor plants.

DIRECTIONS FOR USE

- Prior to planting, apply 100g (a good handful) per square metre of garden.
- Mix thoroughly into the soil.
- Water in well after application.
- Apply once every four weeks to fast growing vegetables and flowers during key growing periods.
- BioFert TE will not harm the roots of seedlings or larger plants.

ESTABLISHED PLANTS

- Apply 100g (a good handful) per square metre around the plants dripline. (The dripline is where the plant's foliage extends to).
- Apply at least twice a year, once in spring and again in autumn.
