MAINTENANCE

HEAT PUMP

Two Seasons. One System. Total Peace of Mind.

Your heat pump works year-round, heating in the winter and cooling in the summer. That means it runs more than almost any other system in your home.

Our Heat Pump Maintenance Program ensures your system operates efficiently, safely, and reliably in every season. We inspect, clean, test, and verify all major components so you stay comfortable, no surprises, no stress.

What's Included

- Full system inspection (indoor & outdoor units)
- Electrical connection and control board testing
- Refrigerant level and pressure check
- Condensate drain inspection and clearing
- Outdoor coil cleaning and debris removal
- Blower motor and fan inspection
- Thermostat calibration and performance check
- Airflow verification and temperature split testing
- Defrost cycle and reversing valve test
- Safety control and system performance verification

As a member,

any repair and
priority booking!

Why It Matters

- Improves energy efficiency and lowers operating costs
- Prevents mid-season breakdowns
- Protects compressor and high-value components
- Maintains manufacturer warranty requirements
- Extends the lifespan of your system
- Keeps heating and cooling performance consistent

Why Rep-Air?

1. We see what others overlook
2. All work is verified using professional, industry-specific tools and technology
3. Local, certified HVAC pros with high standards
4. Transparent, no-pressure service
5. Trusted by families across the Lower Mainland
