Roberto Vidal

Has Demonstrated Practical Expertise By Implementing
A Minimum Of Three AI Assistants.

Hereby Recognized As A

Qualified AI Leader

CONDUCTED BY

Daan van Rossum

FOUNDER & CEO, LEAD WITH AI

PBR Rules Expert

Custom GPT specializing in Philippine private distribution utility rate regulation. Main purpose is to let the user interrogate the rules in a way that a regulatory practitioner would. This involves not just merely text retrieval, but explanations of how the rules work in relation to rate calculations. Can potentially save hours on research and interpretation of interdependencies of tariff-related computations.

ROBERTO VIDAL

VP – Regulatory Affairs,
Distribution

ARR and Tariff Simulator

Built in Gemini Canvass. From a set of inputs (expenditures, WACC, etc.) the tool can present various scenarios of annual revenue requirements (ARR) and tariffs that can be used for quick decisions.

Issuance Monitoring

Conducts weekly monitoring of issuances from the ERC, DOE, and other relevant government agencies, and prepares summaries of regulatory matters that may affect AP's distribution utility businesses.
