The Team

Time-saved figures are working estimates, not measured benchmarks.

Finance Executive Dashboard

CLAUDE COWORK · EXCEL

Turns a 14-sheet, 120-entity Excel model into one self-contained HTML dashboard — 23 charts, 8 tabs, 10 years of actuals plus forecast, drill-down to any entity, and a plain-language question box. Runs offline — no financials leave AboitizPower.

ESTIMATED TIME SAVED

≈20 hrs to build · ≈3 hrs / refresh

Power Industry Peer Watch

SCHEDULED TASK · WEB + GMAIL

Tracks nine groupings — AboitizPower, Meralco and MGen, SMGP, ACEN, First Gen, Semirara, Prime Infra, NGCP — plus WESM prices and regulatory moves. Every item must answer “what does this do to the quarter?”, in plain language.

Delivers a Gmail draft, an entity-tabbed workbook and a filterable HTML brief, all built from one data structure so figures cannot drift.

ESTIMATED TIME SAVED

≈4 hrs / run · ≈16 hrs / quarterly

Mancom Deck Validation

SCHEDULED TASK · GOOGLE DRIVE

Reads the monthly Mancom deck — main slides plus ~16 annexes — and validates every number, narrative and colour marker slide by slide: totals against breakdowns, then EBITDA, NIAT, availability factor and WESM rates across all slides.

ESTIMATED TIME SAVED

≈1-2 hrs / monthly close
