EMAIL TRIAGE

EOB and SOB Email Triage – Google Workflow

Daily Email Triage

Problem: Email Overload

Description: My Daily Email Triage runs 2x a day, at 6pm to 7am to assist me in sorting and prioritizing unread newly received emails

Estimated time saved: ~45 minutes daily

Sharry Salazar

Vice President, Legal & Compliance

CONTRACTS ANALYTICS

Compares terms against guidelines – Google Gem

Javy

Problem: Long review time, missed inconsistencies in the review

Description: Javy streamlines legal review by comparing draft joint venture term sheets against AboitizPower's joint venture guidelines. Since I have included the preferred positions based on the group guidelines, Javy flags discrepancies, non-standard clauses, and potential risks, for further discussion and evaluation with the business development team. By automating this initial comparative analysis, Javy helps accelerate the deal review process for the working group.

Estimate time saved: ~100 minutes per term sheet

BI-WEEKLY PH ENERGY SECTOR UPDATES

Provides Regular Sector Updates – Google Gem and Workflow

KC

Problem: Inconsistent, slow data gathering

Description: KC automatically (twice a week, Monday and Thursday) provides summaries on key Philippine energy updates - ranging from regulatory development, market trends, relevant news and transactions. The summary also provides potential impact analysis to AboitizPower. The workflow allows me to keep abreast with critical sector updates with minimal manual effort, and share the same with my team.

Estimated time saved: ~120 minutes weekly
