Welcome to Holmes University Florida!

Holmes University Florida is part of Holmes Education Group, a global education network with over 60 years of experience helping students build successful international careers.

Education is more than a pathway to a job; it's the spark that transforms potential into purpose. At Holmes, we give you the skills, confidence, and courage to fly with your own wings — because your journey is yours to soar.

- Stephen Nagle, CEO
Holmes Institute Australia

Explore Our Bachelor of Science in Neurodiversity and Workforce Readiness

- Holmes University's Bachelor of Science in Neurodiversity and Workforce Readiness is a career-focused degree designed around the way neurodiverse students learn best. It builds on each student's strengths and prepares them for meaningful work in the real world.
- Every instructor in the program holds qualifications in special education, as does the Academic Dean, and qualified counseling staff are part of the student support team.
- Work-readiness workshops, professional skill development, and job placement assistance are built into the program from start to finish.

Course Structure and Delivery

The degree combines general education, core, and specialization courses, each designed with the neurodiverse learner in mind.

Students choose one of eight career-focused specialization tracks:

- Business & Entrepreneurship
- Health & Human Services
- Creative & Digital Arts
- Early Childhood Education & Development
- Information Science
- Robotics
- Sustainability
- Cybersecurity

Courses are delivered in a hybrid format, combining online and face-to-face instruction and assessment.

New starts are offered nearly every month. Students study in blocks, focusing on one course at a time.
