Anything In Or On Your Tank – Ready to Ship

**WESTERN
PACIFIC
PRODUCTS**

**Part # 1301
Optional Knappco # 7490**

Western Pacific Products has 158 Deg. Fuselinks

Western Pacific Products has fuselinks that melt or come apart at 158 degrees F. The low temperature melting point has been required in the past by California to increase the safety margin where a valve exposed to fire when in the open position would be allowed to spring closed earlier than a valve equipped with a fuselink rated at higher temperature.
