PAYMENT TECHNOLOGY

The Wink Payment Solution is designed to meet the evolving needs of modern businesses, offering a comprehensive solution that's flexible, secure, and scalable. Whether you need to manage payments across devices, streamline billing, or process recurring payments, our platform empowers your business to thrive in today's fast-paced digital economy.

Card Vault + Recurring Payments

Securely store and tokenize payment data with the Card Vault, simplifying recurring payments and enhancing data security. Enable seamless, multi-location transactions with token sharing and customizable billing schedules, reducing operational friction.

Advanced Fraud Controls

Safeguard your business with customizable fraud filters. Set transaction limits, block suspicious activity, and automatically prevent fraud—all with real-time monitoring to protect your revenue and ensure smooth transactions.

Merchant Level Billing

B2B companies, particularly those in the ISO/MSP space, can benefit from being able to offer merchant-level billing and manage recurring payments and fees with flexibility. This functionality is crucial for resellers and service providers.
