

CASE STUDY | CIVIC, COMMERCIAL

Momentary

LITEFLOOR interior glass floors for the Skybar
Observation Deck and first floor

LOCATION

Bentonville, AR

DESIGN GROUP

Wheeler Kearns Architects

OWNER

Crystal Bridges Museum of
American Art

SYSTEM

LITEFLOOR

CONTRACTOR

Advantage Glass LLC

ABOUT THE PROJECT

From Kraft Cheese Factory to Contemporary Art Museum

A former Kraft cheese factory in Bentonville, Arkansas has been given new life as the Momentary, a contemporary art museum. The 63,000 sq. ft. factory building on E and 5th Street was renovated into a space for art, performance and gathering, and it has quickly become popular across Northwest Arkansas.

Greenlite Glass Systems engineered and manufactured LITEFLOOR interior glass floors for two areas of the museum: the Skybar Observation Deck at the Tower Bar and the first floor. Both floors were designed to fit seamlessly into the existing building. One features a white gradient border frit that frames the glass, and the other is fully clear so visitors can see straight through to the space below.

Bringing Glass Floors Into a Historic Factory Building

THE CHALLENGE

Two glass floors, two different looks, one existing building

- Engineer and design glass floor systems that fit seamlessly into the existing building.
- Deliver two different looks: a white gradient border frit on one floor, and fully clear glass on the other.

THE SOLUTION

LITEFLOOR Interior Glass Floors for the Skybar and First Floor

- Engineered and manufactured LITEFLOOR interior glass floors for the Skybar Observation Deck and the first floor.
- A white gradient border frit that frames the glass on one floor.
- Clear glass on the other floor for an open, unobstructed view below.
- Worked with Wheeler Kearns Architects and Advantage Glass LLC to integrate the system into the existing structure.

PROJECT ACHIEVEMENTS

A Seamless Glass Floor in a Reimagined Industrial Space

2 Floors

Skybar and first floor

Gradient

White border frit

Clear

View to the space below

- Seamlessly integrated LITEFLOOR into an existing building.
- Delivered a white gradient border frit that frames the glass.
- Clear glass that lets visitors see through to the space below.

Ready to Work With Us?

LITEFLOOR glass floors are engineered and supplied by Greenlite Glass Systems, alongside the LITEFLAM fire-rated line. Talk to our team about your next project.
