

# Astrapia ONE — Unified Mobile Experience for the Enterprise

Astrapia ONE is the next-generation mobile interface that connects your enterprise into a single, unified experience. Designed as a one-stop shop for employees and partners, it centralizes workflows, notifications, and data from systems like CRM, ERP, POS, and HR into a secure, branded mobile app.

## Key Capabilities

- Unified App Hub — Role-based access to modules (sales, service, operations, analytics) in one app.
- Seamless Integrations — Connect CRM/ERP/POS/HR systems via secure APIs and connectors.
- Offline-First & Sync — Work without connectivity; auto-sync when back online.
- Actionable Notifications — Push alerts, approvals, and escalations with deep links.
- Smart Search & Assistant — Enterprise search with conversational help for faster actions.
- Security & Governance — SSO, MFA, MDM support, RBAC, and audit logs.
- Modular Micro-Frontends — Add or update features without disrupting the whole app.
- Analytics & Insights — Built-in dashboards for adoption, usage, and business KPIs.

## Business Benefits

- Higher Productivity — Reduce app switching and manual steps with one mobile hub.
- Faster Decision-Making — Real-time data and approvals on the go.
- Lower TCO — Standardized mobile platform reduces build and maintenance costs.
- Better Governance — Centralized security, compliance, and version control.
- Frictionless Adoption — Familiar UX with branded look and store distribution options.

## Deployment & Branding

Available as a managed app for iOS and Android with enterprise app store or public store distribution. Supports white-label branding, theming, and regional content packs.
