ABOUT NZ PUMP & ENERGY

NZ Pump & Energy is New Zealand's leading specialist in pump and power rental, delivering critical fluid management and energy solutions to projects of all sizes across the country. Born from the merger of two long-established NZ industry operators with a combined history of over 25 years servicing the country, we bring unmatched technical depth and a modern fleet to every engagement.

From short-term emergency dewatering to long-term infrastructure projects, our nationwide team provides end-to-end solutions — from consultation and system design through to delivery, commissioning, and ongoing support. Our mission is simple: the right equipment, in the right place, ready when you need it. NZ Pump & Energy can also sell a range of pump and generator packages as New Zealand's exclusive distributor of Atlas Copco and Sykes Pumps.

Call us today for all of your Pumping and Power Solutions — Dry Hire or Full Turnkey Solution Contracting Requirements, Sales & Service.

OUR SERVICES & CAPABILITIES

Dewatering Solutions
Groundwater control using wellpoints and sump pumping systems for trench & pit dewatering, with water treatment for discharge-compliant systems for all construction and civil sites.

Sewer Bypass Services
Risk-managed wastewater bypass using auto-prime pump systems backed by telemetry solutions — designed, delivered, and monitored by our team.

Generators & Power Rental
Diesel and battery-backed generator sets for remote sites, temporary power, and critical infrastructure — sizes from 2kVa to 1450kVa twin powered meg sets and everything in between.

Flood & Disaster Response
24/7 rapid-mobilisation for flood relief and emergency stormwater management using trailer and skid-mounted systems.

Battery Energy Storage (BESS)
Clean, quiet temporary power with solar and generator integration — ideal for low-emission or noise-sensitive sites.

Mining & Quarry Solutions
High head and high flow pit dewatering solutions including slurry pumping, dust suppression, washdown, and field servicing for high-demand mining environments.

Civil Construction Support
Turnkey project assistance including environmental control, pipeline installation, site monitoring, testing & compliance.

Wastewater Management
Temporary diversion, settlement tanks, filtration systems, and telemetry monitoring for water treatment projects.
