

Add Instant Storage Permitting to Your Jurisdiction — Free

Automated energy-storage (ESS) permit issuance for Authorities Having Jurisdiction already on SolarAPP+.

Instant

plan review for
code-compliant installations

\$0

cost to your jurisdiction
to activate

8 AHJs

already live in the
Storage Only pilot

Battery storage installations are growing faster than permitting workflows can keep up. Every battery-only or add-on ESS permit today means manual plan review, and staff hours your team doesn't have.

SolarAPP+ Storage Only changes that — instantly, at no cost to your jurisdiction.

WHAT STORAGE ONLY COVERS

Storage-Only Installation

Battery-only installs with no solar — home backup and grid-tied storage.

Add-On ESS

Adding a battery to an existing solar system, including NEM 2.0 retrofits.

Same Workflow

Uses the same code compliance checks as other SolarAPP+ permits — with instant issuance.

BENEFITS TO YOUR DEPARTMENT

- Eliminates manual plan review for ESS permits
- No new system to learn — same platform you already use
- Frees up staff hours for complex, high-value reviews
- Meets growing community demand for battery storage
- Supports SGIP access for disadvantaged communities (CA)
- Helps reduce permit backlogs during wildfire season

GETTING SET UP IS SIMPLE

Standalone Jurisdictions
