Why a Second Practice Is a Different Test

Your first practice succeeded partly because you were physically there to catch problems
early. A second site removes that safety net for both practices at once, not just the new one.

Buy vs Build: Same Seven Fundamentals, Higher Stakes

Buying an existing second site or building a squat raises exactly the same fundamentals
your first practice did. What changes is the stakes: get any of them wrong at site two,
and site one can suffer right alongside it.

What to Prove at Site One Before You Open Site Two

- Can the team run a full day without a single operational decision from you?
- Is case acceptance consistent across every dentist, not concentrated in you?
- Could a manager run the practice for a month without your daily input?

The Financial Reality of Running Two Sites

A second site amplifies whatever is already true about your first, for better or worse.

The failure mode we see most often isn't dramatic: attention drifts to the new site, and

small problems at practice one start slipping through unnoticed.
