

Elevate your connectivity in St Helens

**Your ground to cloud
wholesale partner**

Elevate[®]
Wholesale

Making wholesale connectivity as effortless as it should be

Elevate Wholesale is the partner brand of Elevate

We have built our full fibre network from the ground up, across six HyperCities in the UK, and have now extended our full-fibre network to include St Helens.

We can connect 100,000 businesses to symmetrical speeds of up to 10 Gbps, delivered in as little as 10 days with 100% uptime available.

There's hundreds of our Preconnect® buildings ready and waiting, so you can target tenants with 48 hour instalation.

The Elevate network provides access to the fastest business internet in Britain*.

-  **100,000+ businesses**
passed for connection
-  **100 Gbps**
resilient core network
-  **Over 300 partners**
and growing every day
-  **12 data centres**
based in the UK
-  **20+ million sq ft**
Preconnected office space
-  **6 HyperCities**
with dedicated networks

Seamless, secure network connectivity. No drop-offs. No hand-offs. No hassle.

Disconnected service. Slow response times. Endless complexity. Customers are wary of tech providers, but they shouldn't have to be.

Elevate Wholesale is here to change that.

One company. One installation. One contract. One point of contact, 24/7.

No drop-offs. No hand-offs. No hassle. The support and service your customers want and deserve.

Elevate. The effortless, always-on, seamlessly secure network to build your business on.

£3m Investment

from St Helen's Borough Council
to propel the region's connectivity

Opportunity

While most providers sell access to national networks, Elevate has invested millions building dedicated business fibre to St Helens infrastructure.

Our network is for business users only, offering uncontended symmetrical speeds up to 10Gbps.

Our local network engineers build, manage and maintain the network, getting customers connected in days, not months.

St Helens' Digital Infrastructure Project is at the heart of the borough's ambition to create a world-renowned digital district, enriching the lives of residents and businesses through improved digital, data and technology.

Connectivity across St Helens has been inconsistent, leaving some communities and businesses without access to fast, reliable broadband.

St Helens Council, in partnership with Elevate, is delivering an ultrafast, gigabit-capable full fibre network across the town centre, addressing digital inequality and futureproofing the borough's digital infrastructure.

Elevate's resilient network will deliver speeds of more than 10Gbps, supporting residents, businesses and partners, and laying the foundations for growth and opportunity in a digital future.

Made for St Helens

We're incredibly proud of our work in St Helens, the new full fibre network, installed and supported by local engineers, bring St Helens businesses the speed and service they deserve.

While most providers sell access to national networks, we've invested millions building dedicated business fibre into the very fabric of St Helens infrastructure.

As a key tech player in St Helen's business community, we're helping to build a thriving, dynamic regional economy by:

Full fibre expansion

In April 2025, Elevate was selected to deliver the new full fibre network across St Helens. This forms part of the multi-million-pound investment by St Helens Borough Council into a transformational Digital Infrastructure Project, which aims to make St Helens a world-renowned digital district.

Boosting communication and collaboration

Reliable, high-speed internet empowers businesses to communicate effortlessly, both internally and globally, while enabling the use of collaborative tools like Teams, Zoom, shared workspaces, and cloud services. Powering productivity, keeping operations running smoothly.

Attracting business through infrastructure advantage

Cutting-edge connectivity makes regions more attractive to tech, finance, and creative industries that rely on digital operations. This advantage helps drive investment and attract businesses that depend on fast, reliable internet.

Creating jobs, developing skills and expanding opportunities

Expanding local businesses through robust connectivity generates new jobs, strengthening the regional economy. Reliable networks also enable remote work, allowing companies to widen their talent pool.

"We are very, very particular in who we work with. We have been from the start. Elevate seems to shine so much for us at the minute, they do things particularly well in terms of account management. They're there when you need them to be."

**Ben Ganley, Managing Director,
Liv Unified Communications**

Join us
