

# Pico & the curious code **catastrophe**

Pico wants infinite wobble coins, and he wants them now! But when he downloads a secret tool to hack the game, he gets more than he bargained for. Can Moxo and Luno stop the sirens before it's too late?

Pico was watching a "How to Unlock Secret Stuff" video called HackAttackSnacks99

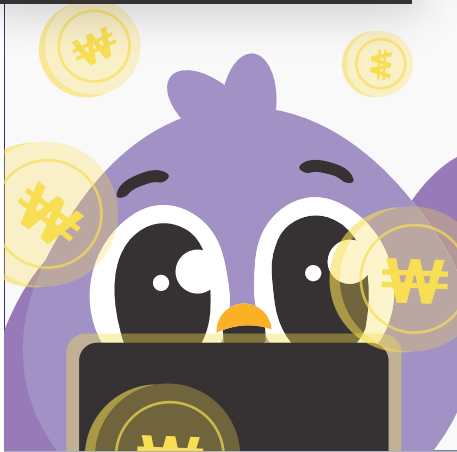

Oooh, If I just copy this code and paste it in to my Jelly World game, I get infinite wobble coins!

Pico whispered

Pico tapped away on the keyboard, desperate to get free credits

Suddenly, alarms blared

And Moxo entered the room

Pico. What are you doing ?!

Pico grinned

I can get free game coin credits if I use this cool tool. The video I watched said it was ok.

And Luno joined the conversation

Cool Tool? More like a tool that will get you in trouble with the police. It will mess with the game - and could get you banned or worse.

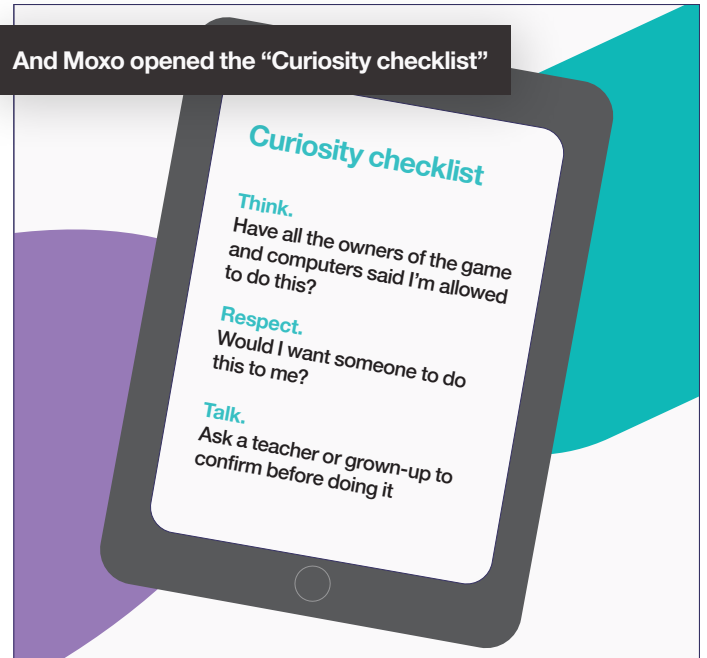

## What Pico didn't know:

- He downloaded a file that breaks the rules of the game.
- The file tried to guess secret codes (not allowed).
- This code messed with other players computers.
- That's called illegal hacking – and even little bits of it are serious.

And Moxo opened the "Curiosity checklist"

Moxo handed Pico a sticker that said:

Smart Coders  
**ASK  
FIRST**

Pico looked sheepish

I didn't want to be a hacker,  
I just wanted more coin  
credits.

You need to learn to code  
your OWN game, you can  
have all the credits you want  
without getting into trouble.

Luno chuckled

Pico beamed

Can I make a game  
with exploding mangos?

Only if you promise not stop  
using cheat codes to get coins.

And add  
Strawberries!
